ident Pompidou leaving yesterday for Iceland.

Nixon, Pompidou Arrive Iceland for 2-Day Talks

By James Goldsborough

REYKJAVIK, Iceland, May 30 (IHT).—Presidents Nixon Pompidou arrived at this North Atlantic outpost this ing in bright, windy weather for two days of talks to help e what nations on both sides of the Atlantic are calling a v relationship" between Europe and the United States.

The two men will begin two days of talks tomorrow morning he Kjarval Museum in the hills above Reykjavik harbor. evening, they held separate meetings with Icelandic leaders iscuss what an Icelandic spokesman described as the "Brit- aggression in Icelandic waters."

The arrivals here contrasted sharply with those at the last ting between these two men, in the Azores 17 months ago. y came in today within 90 minutes of each other under ny skies that were still sunny at 9 p.m., when they headed their separate meetings with Icelandic Premier Olafur annesson. The sun sets for only four hours here at this e of year.

The beginning of the Azores meeting was marked by a dburst, so violent that both presidents were well-doused by time they reached their cars.

The meetings tomorrow and Friday will mark Mr. Nixon's l consultations with European leaders before his fall trip ough Europe. It comes in the midst of heavy diplomatic ivity that is expected to give a clear definition to the new antic relationship before the year's end.

This diplomatic activity includes the final preparations for opening of a full conference on European security and peration in Helsinki; continued preliminary consultations on e reductions in Vienna; the SALT-2 negotiations in Geneva, the preparations for a new Western summit [illegible]

Raids End Is Backed By Senate

Final Major Vote Is Set for Today

WASHINGTON, May 30 (IHT).—Administration supporters, overwhelmed by growing antiwar sentiment, gave up thoughts of a filibuster today and agreed to a vote tomorrow on legislation to cut off funds for the bombing of Cambodia.

Brushing aside personal pleas from presidential aide Henry A. Kissinger, war critics in the Senate yesterday insisted on immediate action to end the bombing.

On a parliamentary issue, the Senate voted 55 to 21 that an amendment by Sen. Thomas D. Eagleton, D., Mo., for cutting off all funds for U.S. bombing of Cambodia and Laos was germane to the $3.6-billion supplemental appropriations bill.

The vote demonstrates that critics of Indochina bombing now have a solid Senate majority. At least 14 senators absent yesterday are also known to favor the cut-off.

After losing the vote on the question of germaneness, Republicans blocked a final vote on the Eagleton amendment itself. They hinted that they might filibuster or otherwise delay final congressional action on the amendment until Mr. Kissinger has met again in Paris with North Vietnamese officials to discuss new agreements to shore up the Vietnam cease-fire.

Mr. Kissinger is scheduled to return to Paris in a week. GOP leaders, who met with him and President Nixon yesterday reported them "optimistic" that "one more negotiating session" might wrap up a new cease-fire arrangement. They said approval of an absolute Cambodia-Laos fund cutoff at this time would weaken Mr. Kissinger's negotiating position.

[illegible] voting for a president, Page 2.

Equal Role Claim

Fund-cutoff supporters said yesterday that failure to block money for continuation of Cambodia bombing would not only allow the war to continue, but would also be a complete abdication by Congress of its claim to have an equal role with the President in determining when the nation goes to war. They said the President lacks any legal right to bomb Cambodia without congressional assent.

Until this year, Indochina fund cutoff amendments have never passed Congress. On a few occasions, they narrowly passed the Senate but always foundered in the House.

The House, in the first vote of its type in that chamber, voted 219 to 188 on May 10 to bar use of any funds in the supplemental appropriations bill from being used for Cambodia bombing. The Pentagon maintains, however, that the House language will not stop the Cambodia bombing because the administration would use funds from other bills to continue it.

As a result, the Senate Appropriations Committee two weeks ago not only endorsed the House language, adding Laos to it, but also adopted the much more inclusive Eagleton amendment. The vote was 24 to 0.

The Eagleton language bars use of funds in the supplemental bill, and also use of all funds previously voted elsewhere.

The measure for two weeks can- cussed for an hour today and de- cided it was useless to resist any longer.

Senate Democratic leader Mike Mansfield, of Montana, vowing "we will stay with this until we finish," won unanimous Senate backing for a vote tomorrow.

ULSTER PROTEST—Catholic women and children picketing a polling place yesterday in the Andersonstown area of Belfast, urging a boycott of Northern Ireland elections.

Thousands Vote in Ulster Despite IRA

By Barry White

BELFAST, May 30 (NYT).—Thousands of Catholic voters went to the polls in Northern Ireland today to elect local council officials in spite of intimidation and harassment by the Provisional wing of the Irish Republican Army.

Last month the militant wing of the IRA called on Catholics to boycott the poll, the first local elections held in the province [illegible] since 1967. And today, in West Belfast, Catholics were jeered by Provisional supporters at polling stations.

In other areas of Ulster, the voting took place almost without incident. Results of the elections, which probably will not be fully known until Friday, will be valuable as a pointer to the outcome of next month's vote for a 78-seat assembly to govern Northern Ireland.

In the worst incident of the day, two candidates of the moderate Alliance party were attacked by a gang of youths as they toured Belfast's Andersonstown area in a loudspeaker truck canvassing voters. One of the candidates, Austin McGrogan, was struck in the hand by an ax that was hurled through the windshield of the truck.

Harassment at Polls

Officials of the Alliance party and the Social Democratic and Labor party, the main Catholic grouping in the province, said their voters had been harassed throughout the day at Belfast polling stations. Flour was tossed at one supporter, and other voters were called "traitors" by crowds of youths brandishing sticks at different polling stations.

The officials of the Alliance party, which claims equal Catholic-Protestant membership, said they had many complaints from supporters who had been threatened last night and were too frightened to vote. An SDLP official said, "There has obviously been a very determined attempt to prevent people going to the polls."

In other terrorist incidents, all in Belfast, a bomb was tossed at

Bradley Defeats Yorty

Los Angeles, 3d Largest City In U.S., Elects Black as Mayor

From Wire Dispatches

LOS ANGELES, May 30.—A black man was elected yesterday as mayor of Los Angeles, America's third largest city.

City Councilman Thomas Bradley, 55, son of a sharecropper, defeated three-term Mayor Sam Yorty, 63, by a margin of 56 percent to 44 percent—431,223 votes to 334,297. Both men are Democrats. Mr. Bradley will take office July 1.

UPI.

Thomas Bradley

Four years ago Mr. Bradley, a former police lieutenant, was beaten by Mr. Yorty by a percentage of 53 to 47.

The election ended a bitter campaign in which Mr. Yorty's opponents accused him of appealing to fear and prejudice of Los Angeles's white population. Blacks make up about 16 percent of the city's 2.8 million residents.

Never before had a black man been elected mayor of a U.S. city as large as Los Angeles.

Other Black Mayors

Carl Stokes, who has since left office, was elected in 1967 as mayor of Cleveland, a city of 750,879 with a black population of 275,879.

Richard G. Hatcher, a black, was elected mayor of Gary, Indiana, but that city's population was about 55 percent black when he won. And feelings were so tense in that 1967 election that the National Guard watched over the balloting.

Newark, New Jersey, had a black population of 60 percent when it elected Kenneth A. Gibson mayor in 1970.

The election Tuesday seemed to bear out what Mr. Bradley had been saying during his campaign —that most voters would not believe charges that he, an ex-policeman, was anti-police and sympathetic to black nationalists.

Mr. Bradley called his victory "the fulfillment of a dream." He said he was told while growing up that, as a Negro, "You can't do this, you can't go there, you cannot achieve this position." He said the vote proved that the statements were false.

"Let us move forward," the 6-foot-4 former track star told a victory celebration. "Let us save Los Angeles from the kind of decay that has overcome so many cities in our country."

He promised to make the city safe from violence, build a rapid transit system, trim waste in gov-

Bonn, Prague In Accord on Normal Ties

BONN, May 30 (Reuters).—West Germany and Czechoslovakia today reached agreement here on a treaty normalising bilateral relations, the West German Foreign Ministry announced.

The accord, the latest success for Chancellor Willy Brandt's policy of reconciliation with Eastern Europe, removed obstacles to normal relations raised by the 1938 Munich pact "in a way satisfactory to both sides," the ministry said.

Czechoslovakia had sought to have the Munich agreement, which ceded the Sudetenland to Nazi Germany, declared null and void from its inception. But Bonn was concerned by the international legal problems it felt this formula would raise.

Details of the treaty draft were not disclosed, but observers said it was likely to open the way for full diplomatic relations between Bonn and Prague.

There was no word either on the compromise formula making the Munich agreement invalid.

This point is of key interest for former Sudeten Germans now living in West Germany who want to visit Czechoslovakia as tourists.

Both Hungary and Bulgaria had made clear that they would open talks with West Germany on normalizing ties only after Bonn and Prague reached agreement.

A joint communique issued after the close of negotiations said the treaty will probably be initialed next month in Bonn in the presence of the foreign ministers of both countries.

Observers expect the formal signing to take place in Prague shortly afterward, and there is speculation here that Mr. Brandt will either sign himself or attend the ceremony as he did with "goodwill" pacts concluded with Russia and Poland.

Talk With CIA Asked by Nixon, Ehrlichman Says

WASHINGTON, May 30 (AP).—Former White House aide John D. Ehrlichman said today that President Nixon ordered members of his staff to meet with CIA officials to discuss whether an FBI investigation of the Watergate affair could expose covert intelligence operations.

Mr. Ehrlichman spoke with newsmen after testifying for two hours at a closed session of the Intelligence subcommittee of the Senate Appropriations Committee.

H. R. Haldeman, former White House chief of staff, also was scheduled to appear but his testimony was put off until tomorrow.

At the meeting held June 23, 1972, Lt. Gen. Vernon Walters, then deputy director of the CIA, was instructed to tell then acting FBI Director L. Patrick Gray 3d that continued FBI investigation of the movement of Republican campaign funds to a Mexican bank could compromise CIA activities, Mr. Ehrlichman said.

Mr. Ehrlichman denied he ever asked the CIA to provide technical assistance in 1971 to E. Howard Hunt jr., a convicted Watergate conspirator.

Gen. Robert E. Cushman, CIA deputy director at that time, has named Mr. Ehrlichman as the White House official who asked the agency to help Hunt in an activity that later culminated in the burglary of the office of Daniel Elsberg's psychiatrist.

Mr. Ehrlichman's story is in direct conflict with that of Gen. Cushman, who has testified that Mr. Ehrlichman called him to request that he assist Hunt.

Gen. Cushman said in an affidavit to a House subcommittee May 11: "About 7 July 1971 Mr. John Ehrlichman of the White House called me and stated that Howard Hunt was a bona fide employee, a consultant on security matters, and that Hunt would come to see me and request assistance which Mr. Ehrlichman requested that I give."

Mr. Ehrlichman said today that the White House meeting last June 23 "was held at the President's request because the President was legitimately concerned about the national security aspects."

He said the CIA officials were asked three questions. First, whether there was any CIA involvement in the Watergate break-in. He said they answered there was not.

Second, he said, the CIA of-

Mitchell Aide Said to Tell Of Payoffs

By Bob Woodward and Carl Bernstein

WASHINGTON, May 30 (WP).—Frederick C. LaRue, a top campaign aide to former Attorney General John N. Mitchell, has stated that he paid about $250,000 in cash to the Watergate conspirators for their silence after their arrest, according to government sources.

Mr. LaRue's statement implicates the following persons in the payoff scheme, the sources said: Mr. Mitchell; Herbert W. Kalmbach, who was then the President's personal attorney; and John W. Dean 3d, then the President's White House counsel. Mr. Kalmbach no longer is the President's lawyer and Mr. Dean has been fired from his position.

Mr. LaRue, the sources said, has testified to the Watergate grand jury that he delivered about $200,000 in cash to Watergate conspirator E. Howard Hunt jr. and his attorney, William O. Bittman; $25,000 to the four Miami defendants in the Watergate case; and another $20,000 to $35,000 to Peter Margoulis, the attorney for Watergate conspirator G. Gordon Liddy.

The $200,000 delivered to Hunt and Mr. Bittman apparently was for distribution to the other Watergate conspirators too, according to the sources.

Sealed Envelopes

Mr. Bittman reportedly received three or four sealed envelopes for delivery to Hunt and has said that he did not know that the envelopes contained money.

It has been reported previously that Hunt's late wife, Dorothy, was the intermediary who supplied Watergate conspirator James W. McCord jr. and the four Miami defendants with cash payments before her death in a Chicago plane crash in December.

Mr. LaRue testified that he sent the money to the conspirators or their attorneys on about

(Continued on Page 2, Col. 2)

Mills Asks Nixon To Set Immediate Pay-Price Freeze

WASHINGTON, May 30 (Reuters).—Chairman Wilbur Mills of the House Ways and Means Committee urged President Nixon today to impose a wage-price freeze immediately to restore faith in the U.S. economy, damaged by the Watergate affair.

Rep. Mills, D., Ark., urged a broad program of action by the administration, led by the wage-price freeze.

If a wage-price freeze was needed Aug. 15, 1971, Rep. Mills said, "the need today is even stronger."

He said a temporary, hard hold on prices and wages would give Congress time to write a limitation on government spending and would aid coming negotiations on monetary policy and trade.

In an obvious jibe at Federal Reserve Board chairman Arthur Burns, who has been advocating a flexible business investment tax credit, Rep. Mills said, "We are not going to turn into a yo-yo those tax provisions we need to get the investment the nation requires."

British Foreign Office man said: "We do not what it is that the Ice- government are complain- out nor do we know what Icelandic law which he is to have infringed. We are in touch with our embassy in Reykjavik, but we have no further information at present."

NATO Split Seen

MOSCOW, May 30 (Reuters).—The Soviet newspaper Pravda today presented the cod war as a sign of a split between the big and small members of NATO.

The Soviet Union, which has huge fishing fleets, is understood to oppose Iceland's unilateral extension of its fishing limit, but the press recently has sharpened its criticism of Britain's role in the dispute.

Air Strike Date Not Set in France

PARIS, May 30 (Reuters).—The main French air traffic controllers' union decided today not to set a date for a possible resumption of the strike which crippled air transport for a month earlier this year, but members indicated they may walk out again "very soon."

A spokesman for the controllers said they wanted to keep the date for a new strike a surprise.

The air controllers struck from Feb. 20 to March 20 to back demands for a revised salary scale and for the right to strike, now denied them.

Against Laos and Cambodia

Canada Hits Hanoi Cease-Fire Violations

SAIGON, May 30 (AP).—Ambassador Michel Gauvin, head of the withdrawing Canadian peacekeeping delegation, said today that the most serious violation of the peace agreement has been North Vietnam's disrespect for the neutrality of Laos and Cambodia.

Article 20 of the Jan. 27 Paris agreement on Vietnam says the signers "shall respect the neutrality of Cambodia and Laos."

Mr. Gauvin said that in addition to Hanoi's failure to fulfill that commitment, allegations of North Vietnamese infiltration into South Vietnam since the cease-fire had been "pretty substantially supported."

Commenting on Canada's decision to pull out of the Four-Nation International Commission of Control and Supervision by July 31, Mr. Gauvin said the ICCS has failed to function effectively.

He blamed this on the failure of "some parties" to the Paris cease-fire agreement to live up to their commitments. He did not name the parties, but left the clear impression he was referring to the Viet Cong and North Vietnam.

Mexico, France, Italy and the Scandinavian countries were among those mentioned today to replace Canada on the cease-fire commission, but Mr. Gauvin recommended an Asian country.

Radio Hanoi today denounced Mr. Gauvin for hinting "that the Viet Cong are mostly guilty" of cease-fire violations.

"This is a wrong statement exposing Gauvin's dark intention to protect the Saigon and U.S. side," it said.

In Paris, delegates from South Vietnam and the Viet Cong's Provisional Revolutionary Government met for the 13th time today to seek a political solution. Their meeting ended after 1 hour 45 minutes without report of progress.

● Canada's withdrawal called sharp blow to policing truce. Page 3.

Oil Pact Possible By Tomorrow

GENEVA, May 30 (Reuters).—The major oil-producting countries and Western companies tonight adjourned their negotiations over higher oil prices here amid signs that the deadlock would be broken in 48 hours.

Abderrahman Khene of Algeria, secretary-general of the 11-nation Organization of Petroleum Exporting Countries, told reporters the two sides would meet again tomorrow afternoon for further bargaining.

He added: "There is a good hope that agreement might be reached by Friday."

'Moral Instigation' Held Possible

Status of King Probed in Greek Mutiny

By Mario Modiano

ATHENS, May 30 (NYT).—The military judge investigating the Greek Navy's abortive plot to topple the army-backed government was reported by the press today to be examining possible contacts between the mutineers and exiled King Constantine.

"The outcome of the inquiry will determine the fate of the monarchy," said a pro-regime daily, Acropolis. It discussed chances that King Constantine, from his exile in Rome, may have encouraged or instigated the naval coup. More than 35 naval officers are being charged after an abortive bid last week to hijack the fleet and oust the government.

Gen. Gregorios Skembeas, of the military judiciary, who is conducting the inquiry, has disclosed nothing. But the newspapers, which say the government planned to abolish the monarchy altogether, said he was investigating particularly the question of moral instigation of the plot.

Two retired generals, known as royalists, have been arrested this week. They were among 34 generals and admirals, retired or ousted by the regime, who signed an appeal for political freedom.

Government spokesmen said this statement had been intended to create the appropriate atmosphere for the naval mutiny. The two arrested officers, Lt. Gen. Andreas Vardoulakis and Maj. Gen. Panourghias Panourghias, were ousted in 1967 when a handfull of colonels seized power.

After King Constantine's unsuccessful counteroup later in that year, which forced him into exile, the two generals, with a large number of other royalists, were detained, then banished to remote villages as security risks. They were released 18 months ago.

Acropolis said: "An important factor in establishing eventual responsibilities on the part of the king—which would substantiate charges of moral instigation—is the fact that the protagonists of the plot were linked to King Constantine and had helped him in his earlier attempt to topple the revolutionary government."

It added: "It is therefore natural, according to the same observers, that particular significance should be attached to the progress and conclusions of the inquiry, whose outcome will clearly be linked to the king's fate."

Newspapers, which under strict press laws have not published political speculation, were given free rein in their reports of the future of the monarchy. Officially, nothing has been said. King Constantine, under the regime's constitution, is still the head of state.

One Athens lawyer, Sotirios Metaxotos, has sued the publisher of the newspaper Eleftheros Kosmos for insinuating that the king was involved in the mutiny. This, he said, was an insult to the head of state and was punishable under the Greek penal code.

President Figueres Denies Impropriety

Costa Rican Defends Vesco Deal

By Richard Severo

SAN JOSE, Costa Rica, May 30 (NYT).—President Jose Figueres says he urgently needed a huge injection of capital for his financially troubled company, looked everywhere for potential investors and wound up with Robert L. Vesco, but does not know him very well.

In fact, he said in a four-hour interview last weekend at his country home near here, they are not personally close.

Mr. Vesco, a financier from New Jersey, is making substantial investments in Costa Rica.

He was indicted by a federal grand jury in New York on May 10 along with former Attorney General John N. Mitchell, former Secretary of Commerce Maurice H. Stans and Harry L. Sears, a former majority leader of the New Jersey Senate. All were charged with conspiracy to defraud the United States and obstruct justice.

In addition, Mr. Vesco and 40 other persons and corporations have been accused of defrauding stockholders of Investors Overseas Services, an international mutual fund based in Geneva, of $224 million.

Mr. Figueres, 67, said he had no personal knowledge or evidence regarding the allegations against Mr. Vesco, but emphasized that as far as he could determine, Mr. Vesco had done nothing improper in Costa Rica.

"Vesco," Mr. Figueres sighed. "I suppose I have spoken with him five or six times now. We tend to have short conversations, Vesco and I. He is a financier. He does not have my interests. I am what you might call a farmer-philosopher and he—well, I don't understand all that financial jargon. If we have something to talk about, we talk, but our conversation breaks up soon because aside from business there is nothing to discuss. You know, real friendships are based on common interests."

N.Y. Bank Account

Mr. Figueres went on national television to discuss his New York bank account after the Wall Street Journal published an article saying that the account had grown by $325,000 since Mr. Vesco started investing in Costa Rica.

The president said that it had actually grown by $436,000, insisted there was nothing improper in that and described the account as a conduit for projects in which he was interested but from which he does not personally profit.

"What nonsense!" he said in the weekend interview. "That account in New York is the only foreign account I have and I can tell you that New York is not the place to have a bank account if you are up to no good."

He said, for example, that one item, of $60,000, was a donation from Richard E. Pistell, a friend of Mr. Vesco and Stanley Graze, a financier connected with IOS, to establish a tree farm as part of the endowment for the Costa Rican National Symphony Orchestra. Mr. Figueres has a passion for music.

Mr. Figueres's company, which he began in 1928, is Sociedad Agricola Industrial San Cristobal, S. A. Its four subdivisions produce burlap coffee bags, polypropylene bags, rope, twine, and lumber, raise cattle and grow bananas.

4th Largest Employer

Company officials say it occupies some 12,000 acres and employs about 3,000 persons, making it the fourth largest employer in Costa Rica.

By his own account, Mr. Figueres detests the day-to-day details of business. He would rather think and talk of the Latin Americans he admires (a painting of Simon Bolivar is over the fireplace), listen to a violin concerto or consider the destiny of Costa Rica, the only nation in Latin America that does not have an army.

Mr. Figueres abolished it in 1948. "I am egotistical enough to believe," he says, "that if anyone ever attacked us, the Costa Ricans would rise up as citizens and defeat them."

Mr. Figueres, 66, has served three terms as president, but not consecutively.

It is not uncommon in Latin America for public officials, even heads of state, to continue their business interests while in office.

AP.
President Jose Figueres.

Mr. Figueres, however, estimates that some or all of San Cristobal's subdivisions lost money in 1969, 1970 and 1971.

Mr. Figueres says he was introduced to Mr. Vesco in 1972 by Mr. Pistell.

"We needed an injection of cash badly," said Mr. Figueres. "I had been looking everywhere."

Mr. Vesco was willing and arranged for the investment of $2.15 million in San Cristobal. Although Mr. Figueres says he cannot remember exactly what the investment constituted, Enrique Carreras, an executive vice-president of a subsidiary, says it represented both the sale of stock and a loan. The loan has been termed "unsecured" and the result has been rumors that it was a gift, a kind of bribe by Mr. Vesco to Mr. Figueres so that Mr. Vesco could make Costa Rica his haven.

"How absurd," commented Mr. Figueres. "We have a wide open policy on investment. Nobody has to bribe anybody to invest here. San Cristobal needed money, it is as simple as that."

Mr. Carreras estimates that Mr. Vesco and his associates own 30 percent of San Cristobal while the president, his son and a few other Costa Ricans own the rest.

$250,000 Disbursed by Him

Mitchell Ex-Aide Reportedly Testifies of Watergate Payoff

(Continued from Page 1)

seven or eight occasions, by messenger from his office at the Committee for the Re-Election of the President, the sources said.

The first payments, according to the account of Mr. LaRue's testimony, were made in July, just weeks after the June 17 arrests in the Democrats' Watergate headquarters. The money came from an $80,500 cash campaign fund which, Mr. LaRue testified, he received from former Commerce Secretary Maurice H. Stans, the chief Nixon fund-raiser, and former Nixon campaign treasurer Hugh W. Sloan jr.

Unaware of Use

Mr. Stans and Mr. Sloan were not aware of the use of the cash campaign funds, according to government sources.

In addition, the sources said, Mr. LaRue later drew payoff money from a $350,000 cash fund that was turned over to him by the White House after the November presidential election.

The $350,000 was raised for the President's re-election and kept in the White House from about April, 1972, to November, 1972, on orders of former White House chief of staff H. R. Haldeman, the sources said.

Mr. Kalmbach had previously told the General Accounting Office that he raised $210,000 last summer for distribution to the Watergate defendants and their attorneys.

At Least $460,000

Mr. LaRue's $250,000 and Mr. Kalmbach's $210,000 mean that at least $460,000 was spent on the Watergate cover-up.

According to the sources, Mr. LaRue testified that most of the payments were approved by Mr. Dean and that at least once a payment was approved by Mr. Mitchell.

Mr. LaRue, Mr. Mitchell, Mr. Kalmbach and Mr. Dean are under investigation for obstructing justice in the initial Watergate probe last year. Reliable sources said that the prosecutors have sufficient evidence to indict Mr. LaRue, Mr. Mitchell, Mr. Dean and others in the case.

According to the sources, Mr. LaRue expects to be indicted on fewer charges or receive a lighter sentence than the others in exchange for his testimony and cooperation with the investigation.

Mr. Mitchell and Mr. Stans already have been indicted in connection with a secret $200,000 contribution to the Nixon campaign by financier Robert L. Vesco.

New Prosecutor

Mr. LaRue has dealt with the prosecuting team headed by principal assistant U.S. Attorney Earl J. Silbert. Archibald Cox, a Harvard law professor, is the special prosecutor in the case now, and he made it clear yesterday that all decisions about indictments, theory of prosecution and immunity will be made by him.

Most of the information received from Mr. Dean deals with his own role in the case and that of two former presidential deputies, Mr. Haldeman and John D. Ehrlichman, the sources said.

That information includes the initial tip that led to the discovery of the break-in at the office of a psychiatrist for Pentagon papers trial defendant Daniel Ellsberg and the destruction of Watergate evidence by former Acting FBI Director L. Patrick Gray 3d.

In addition to such specific information, Justice Department sources said, Mr. Dean has provided the Watergate prosecutors with a general outline of his dealings with President Nixon in regard to the Watergate case.

Ehrlichman Testifies Nixon Ordered Staff Talk With CIA

(Continued from Page 1)

ficials were asked whether a vigorous FBI investigation would uncover any past covert CIA activities. Again, the CIA officials said it would not.

But, said Mr. Ehrlichman, when asked whether a vigorous FBI investigation might uncover current covert CIA activities, the intelligence officials were unable to give a definite answer.

It was because of that, he said, that Gen. Walters was instructed to inform Mr. Gray of that possibility.

Asked whether the President knew the Mexican investigation by the FBI involved contributions to his re-election campaign, Mr. Ehrlichman said, "I don't know what the President knew."

Mr. Ehrlichman commented that "at the time we were the subject of very extensive hemorrhaging in cases under investigation by the FBI."

Asked to comment on reports that Mr. Gray subsequently told Mr. Nixon that he was in danger of being "mortally wounded" by members of his White House staff, Mr. Ehrlichman said he understood Mr. Gray made the comment after Gen. Walters told him of "some improper requests made of the CIA by a White House person."

Mr. Ehrlichman initially said "White House people," then corrected himself, and when asked to whom he referred he said John W. Dean 3d, the ousted White House counsel.

Mr. Ehrlichman said the first he knew of CIA assistance to Hunt was when Gen. Cushman called him and said the agency was anxious to terminate its role because it felt Hunt was going beyond his original request.

In other developments:

● Chief U.S. District Judge John J. Sirica today signed a 20-day delay of immunity for Mr. Dean and Jeb Stuart Magruder, also a former White House aide.

The delay will keep the two men from testifying in the Senate Watergate hearings until at least June 18.

Judge Sirica responded to a Justice Department request for the delay. There was no explanation from the department as to why it made the request.

Mr. Dean and Mr. Magruder, who became deputy manager of the Nixon re-election campaign, were voted limited immunity by the Senate Watergate committee in exchange for testimony about Watergate planning and subsequent cover-up efforts.

● Chilean diplomats said there were four break-ins at the embassy in Washington in 1972 and that burglary may have been used as a cover-up for a search for documents. The Daily News of New York said that despite Mr. Nixon's denial, a 1970 plan for expanded intelligence-gathering was carried out and the administration made plans for wiretapping, interception of mail, harassment by tax officials and surveillance of groups thought to threaten the administration.

● Supreme Court records showed that as recently as 1972 the court suggested that "in proper circumstances" the President could be subpoenaed to appear in court.

The White House said yesterday that Mr. Nixon would not testify before the Watergate grand jury. The White House asked the independent Watergate prosecutor, Archibald Cox, to find out who made such a suggestion.

● Sen. William Proxmire, D., Wis., today called on Gen. Alexander Haig to either resign from the Army or step down from his present position as Mr. Nixon's White House chief of staff.

Sen. Proxmire said in a statement:

"Two hundred years of military tradition and good sense have been violated by Gen. Haig's acceptance of a political post in the White House.

"It compromises the military and it compromises the political process."

● Rep. Charles H. Wilson, D., Calif., chairman of a House post office subcommittee, asked for an investigation into reports that mail of two democratic presidential candidates was illegally opened. Rep. Wilson, in a letter to Postmaster General E. T. Klassen, said he was trying to confirm information that the federal Watergate grand jury is investigating.

A congressional aide to Rep. Wilson, George B. Gould, said some of the mail of Sen. Edmund S. Muskie, D., Maine, was apparently set aside in the Washington, D.C., post office, copied and put back in the original envelopes. This reportedly occurred during Sen. Muskie's 1972 presidential bid in New Hampshire.

The mail of Sen. George McGovern, D., S.D., was also apparently tampered with while he campaigned for the Democratic presidential nomination in Florida, Mr. Gould said.

Libya Charges U.S. Aggression In UN Complaint

UNITED NATIONS, N.Y., May 30 (Reuters).—Libya today charged the United States with aggression and accused the U.S. Sixth Fleet of conducting "irresponsible and foolhardy missions" against it.

The Libyan complaint was lodged with the president of the Security Council, Sudanese Ambassador Rahmatalla Abdulla. But Libya did not ask for a meeting of the council to deal with the question.

Libyan Ambassador Kamel Hassan Maghur cited two specific incidents of U.S. actions.

He said that on March 21 a U.S. C-130 "spy plane" entered Libyan air space and was intercepted by the Libyan Air Force.

On April 30, a U.S. aircraft carrier based near the Libyan coast transmitted radar beams across the range of Libyan radar "in order to detect the movement and whereabouts of the Libyan Air Force and further to jam the Libyan radar," he said.

At the same time, Libya complained, a wave of U.S. aircraft was launched from the carrier "to interfere with Libyan training flights in the area."

Design Is Disclosed For Kennedy Library

BOSTON, May 30 (AP).—Plans were unveiled yesterday for the John F. Kennedy Library, a pyramidal building that will hold the papers and memorabilia of the late President.

Construction of the $27-million complex is scheduled to begin next year across the street from Harvard University in Cambridge, where Kennedy went to college.

CIA Ex-Aide Testifies Hunt Violated Trust

In Involving Agency In Ellsberg Burglary

LOS ANGELES, May 30 (NYT).—Gen. Robert E. Cushman jr., a former Deputy Director of Central Intelligence, told a Los Angeles grand jury yesterday that E. Howard Hunt jr. had "violated" his "trust" by involving the CIA in the burglary of the office of Daniel Ellsberg's psychiatrist.

Gen. Cushman, now commandant of the Marine Corps, was the opening witness before the grand jury, which is investigating the break-in of Dr. Lewis Fielding's office on Sept. 3, 1971. Hunt has admitted having a role in the burglary while acting as a White House consultant.

All charges against Mr. Ellsberg, a Pentagon papers trial defendant, were dismissed on May 11 because of what the judge called government misconduct in the case. President Nixon has admitted starting an investigation of Mr. Ellsberg's "associates and his motives," but has denied authorization or knowledge of illegal operations.

At a news conference after his testimony, Gen. Cushman said that John D. Ehrlichman, then President Nixon's chief domestic adviser, had called him in July, 1971, and asked him to aid Hunt.

'Sensitive Interview'

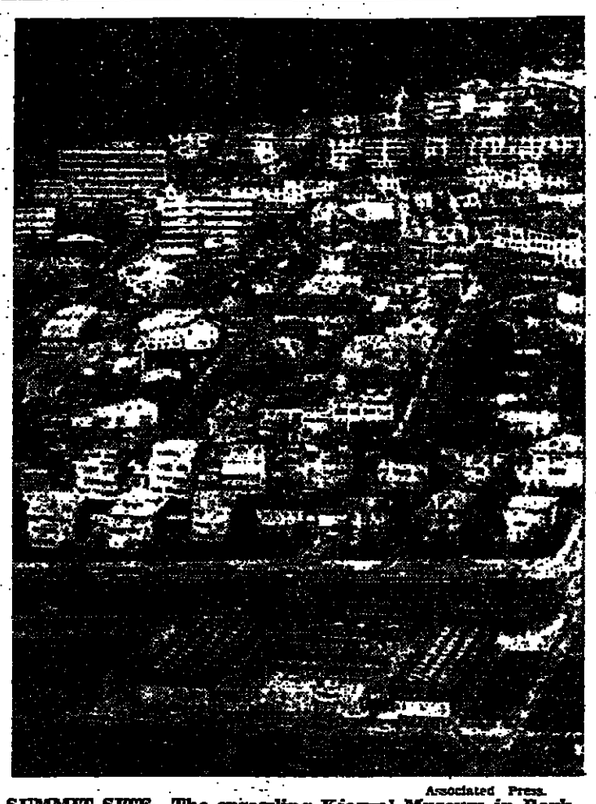

Hunt, Gen. Cushman said, a CIA employee for 20 years, told him that he had a "very sensitive interview" to conduct and needed such things as false identification papers and a wig. Gen. Cushman said he had agreed to the requests, but subsequently became suspicious when Hunt began asking for further help, including an office and a secretary.

Gen. Cushman said he had then called Mr. Ehrlichman and told him that the agency could no longer aid Hunt, and that he considered the former agent to have "questionable" judgment. Several days later, the break-in occurred at Mr. Ellsberg's psychiatrist's office in Beverly Hills, Calif.

Asked how he felt after learning about the burglary, Gen. Cushman said, "I certainly think I was put upon" by Hunt. Asked if he felt the same way about Mr. Ehrlichman, the general declined to comment, saying he did not know how much Mr. Ehrlichman knew about Hunt's activities.

When reporters asked Gen. Cushman's reaction to the fact that Hunt had continued to work for the White House after Mr. Ehrlichman had been told that Hunt had questionable judgment, the general said: "I wish they had taken my advice."

In June, 1972, Hunt was involved in the Watergate break-in, for which he was subsequently convicted.

Nixon and Pompidou Arrive In Iceland for 2 Days of Talks

(Continued from Page 1)

and the Nixon round of trade negotiations.

The Nixon-Pompidou talks here will be especially important because, as before, the American and French views are wide apart. Thus, French sources were saying earlier this week that presidential adviser Henry A. Kissinger's proposal for a "new Atlantic charter" had been dropped, largely over the tepid French reaction to the proposal. The most that is discussed now in diplomatic corridors is the notion of some sort of U.S.-European declaration that could contribute to redefining the relationship.

The two presidents are certain to focus here on much of the monetary and trade detail that threatens to slow future agreements and to discuss the increased political commitment Washington wants from Europe.

Mr. Pompidou will especially be seeking assurances from Mr. Nixon that Washington will eventually return the dollar to convertibility and enter the trade talks on the basis of strict reciprocity. He would also like an affirmation from Mr. Nixon that the United States is not out to disrupt the Common Market agriculture policy.

The Pompidou jet arrived first today, followed 90 minutes later by Air Force One. Both presidents were met by Icelandic President Kristjan Eldjarn.

Iceland was agreed on as a site for the meeting because of Mr. Pompidou's reluctance to return to Washington for a second visit before Mr. Nixon made a return trip to Paris.

Mr. Nixon said he planned to stay out of the cod war.

Shortly after President Nixon left his meeting with the Icelandic leaders, police reported that a small explosion had taken place outside the United States Information Service building, about two miles away. Police said a Molotov cocktail had been hurled at the structure, shattering its plate glass windows. No injuries were reported.

Group Protesting French A-Tests Kept From EEC

BRUSSELS, May 30 (Reuters).—Belgian police today prevented an international group of peace marchers, protesting against French nuclear tests, from approaching the headquarters of the European Economic Community's Executive Commission.

The police escorted the 20 marchers, who came from 11 countries, across Brussels but told them to stop as they approached the commission building.

A spokesman for the police said they had orders from police headquarters and the commission itself not to let the protesters near the building.

Australian Mothers

SYDNEY, May 30 (Reuters).—Two Australian mothers and their babies left Sydney for Paris today to protest the planned French nuclear tests in the Pacific.

They are Mrs. Joan Nelson, 30, and her 13-month-old daughter, Saffron, and Mrs. Moya Cahill, also 30, and her 8-month-old son, Jasper.

Mrs. Nelson said, "We are just mothers, worried mothers, and we simply wish to deliver a letter to the French government which we believe expresses the majority feeling of Australian women against the tests."

Greece, East Germany Establish Relations

ATHENS, May 30 (UPI).—Greece and East Germany announced today the establishment of diplomatic relations.

Greece is the 84th country to establish diplomatic links with East Germany since it signed a goodwill treaty with West Germany last December.

Rogers Asserts U.S. Will Heed Latin Nationalism

WASHINGTON, May 30 (AP).—"The growing feeling of nationalism" in every country he visited is the most significant impression reported after a 17-day trip to Latin America by Secretary of State William P. Rogers.

"We do not see why we can't cooperate fully with this sense of nationalism," he said, adding that he foresaw a greater global role for Latin America, especially in such areas as fishing rights and trade and monetary reform.

Speaking yesterday at a swearing-in of Jack B. Kubisch as assistant secretary of state for inter-American affairs, Mr. Rogers expressed sympathy for Latin American complaints about the hemispheric trade deficit, which has averaged $600 million in recent years.

"That has to be changed," he said, adding that the administration hopes to allow greater Latin American access to U.S. markets.

Mr. Rogers returned Monday night from an eight-country tour.

He said that the nationalistic feeling apparent in the countries he visited carried no anti-U.S. overtones. The secretary said "there was not one hostile act" directed at him during his trip.

Los Angeles, 3d Largest City In U.S., Elects Black as Mayor

(Continued from Page 1)

ernment and cut taxes for those most heavily burdened.

He had made integrity in government an issue and said "no special interest will receive better attention than the lowliest citizen of our community."

Yorty's Statement

As in 1969, Mr. Bradley and Mr. Yorty emerged 1-2 from the April primary, and Mr. Bradley went into the runoff leading in the polls.

As Mr. Yorty went to bed, he declared that the change to a Bradley administration "will be a very radical one and there will be a lot of people who wish they got out to vote."

His aides blamed his loss on a low voter turnout, particularly in the sprawling middle-class areas of the San Fernando Valley.

About 65 percent of the city's 1.2 million registered voters went to the polls, election officials said, compared with a 78 percent turnout four years ago.

Political correspondents attributed Mr. Bradley's success to several factors. They felt his campaign, in which he stressed his record in the City Council and his background as a police veteran, was an effective one.

They also felt that Mr. Yorty had become especially vulnerable to charges that he was an absentee mayor. Always a traveler, Mr. Yorty in the last four years was absent from his post for a total of one year.

The absenteeism together with Mr. Yorty's campaign for governor in 1970 and the Democratic presidential nomination in 1971 provided fuel for Mr. Bradley's charges that the mayor had become bored with his job.

Still another factor in the election was the changed racial climate in which racial riots and increased black militancy were farther in the past.

Heath Contacts Wilson to Start Process for Scandal Inquiry

LONDON, May 30 (Reuters).—Prime Minister Edward Heath today moved to set up an official inquiry into Britain's sex scandal within hours of his return from a private visit to West Germany.

Mr. Heath sent a letter by hand to the Labor opposition leader, Harold Wilson, on terms of reference for the inquiry, expected to begin next week.

Consultation with Mr. Wilson is an essential preliminary to the probe.

Sources predicted that the inquiry would delve deeply into events leading to the resignations last week of two government ministers, Lord Lambton and Lord Jellicoe. Both issued statements admitting liaisons with prostitutes.

Security Commission

The inquiry will be by a three-man panel under Lord Diplock, chairman of the Security Commission set up in January, 1964, to investigate breaches of security in the public service.

Lord Diplock will pick two members of the six-man commission to take part in the inquiry.

Possible members apart from Lord Diplock are Lord Simon, Lord Sinclair, General Sir Dudley Ward, who is a former commander of the British Army of the Rhine, a former top civil servant, Sir Philip Allen, and Lord Garner, once Britain's high commissioner in Canada.

Munich Man Sentenced

MUNICH, May 30 (Reuters).—A court here tonight sentenced a Munich escort agency boss who admitted arranging a "girl-swap" deal between Britain and West Germany to one year's imprisonment for pimping.

Hans-Ulrich Althoff, 31, was found guilty of procurement but was acquitted of living on immoral earnings. He had denied both charges. His lawyer said he would appeal.

The prosecution alleged today that the head of "All Round Hostess Services" had used girls from his agency as prostitutes, charging up to 1,000 marks for them.

In a plea for leniency, the defendant said today he had never compelled his girls to sleep with customers, and had not acted as their pimp. Some of the former hostesses told the court yesterday they had slept with customers, and one of them said Mr. Althoff had paid her for doing so.

Thousands Vote in Ulster Despite IRA

(Continued from Page 1)

a polling station in the Lower Falls but failed to explode. Sniper shots were fired at British soldiers near a polling station in Ballymurphy.

Two Bomb Blasts

In the center of Belfast, two car bombs exploded, injuring one person and damaging several buildings. And in Coalisland, County Tyrone, two 75-pound bombs in milk churns were defused.

British soldiers made themselves inconspicuous, standing guard on side roads, while policemen were on duty inside the stations. There were no incidents at all in Protestant areas of Belfast.

The Provisionals had mounted a strong pre-election campaign, mainly through pamphlets, to discourage Catholics from voting. One pamphlet warned, "Those who vote will be traitors—and they will be seen as traitors." The Provisionals opposed the election because of the British administration's continued detention without trial of many of their members.

More than a million voters (about two-thirds Protestant and one-third Catholic) were eligible to vote for 1,200 candidates vying for 500 seats in 26 district councils.

Lord Diplock

Yemeni Leader Assassinated Reportedly by South Yemen

BEIRUT, May 30 (UPI).—An ambush party from South Yemen today assassinated Sheikh Mohammed Ali Othman, one of North Yemen's three top leaders, the Middle East News Agency reported.

"The assassination of Othman, known as a moderate in Yemeni affairs, could further endanger plans for union between North and South Yemen," an Arab press commentator said.

The agency said the attack on Sheikh Othman took place as he was leaving his home in Taiz, North Yemen's second-biggest city, 20 miles from the South Yemen border.

"He was fired at by ambushers using bazookas and machine guns, who came from the other side of the border," the agency said.

One of Three Rulers

Sheikh Othman, a 63-year-old former judge, was one of the three members of North Yemen's ruling Republican Council. The other members are Abdel Rahman Iryani, president of the council, and Lt. Gen. Hassan al-Amri, commander in chief of the North Yemeni armed forces.

The council was established in 1966 to give North Yemen "collective leadership" and represen... tation of the nation's t... Moslem sects.

...nada's Withdrawal Called ...rp Blow to Policing Truce

By Thomas W. Lippman

...ON, May 30 (WP).—Can...ecision to withdraw from ...ternational Commission of ...and Supervision in Viet...llows a month of growing ...sion as the ideological ...s within the commission ...more and more evident. ...re than the commission's ...balance is at stake in ...'s departure on July 31. ...Canadians are the admin...s and logistical heart of ...anization, the best trained, ...uipped and most vigorous ...four delegations. ...s doubtful from the begin...as the Canadians said ..., that the commission ...ver be an effective arbiter ...peace in Vietnam, because ...built-in political problems. ...y could have been found ...come the ideological split, ...mission had the material ...ity to do the job. ...out Canada, it does not ...ven that. In communica...air transport and logistics, ...-member Canadian force ...d the commission's lifeline. ...not particularly surprised," ... official said yesterday. ...is going to make it a ... a lot tougher to salvage ...CS. The Canadians have ...carrying the ball on all ... and it will be very tough ...d anyone with their level ...erience and competence."

...spects for Replacement

...ces at the U.S. Embassy ...d to speculate on a possible ...or to Canada. It is clear, ...r, that the range of pos...s is very limited. ...would have to be a nation ...whom we have good ideolo...gical relations, to keep the political balance," one U.S. source said, "but it also would have to be someone with the organizational and leadership capability to replace the Canadians. And it would have to be someone willing, and politically able—at home—to take on the job."

Spokesmen for the Saigon government expressed "deep regret" and "dismay" over Canada's decision and blamed the Polish and Hungarian delegations for it. A spokesman for the Foreign Ministry likened Canada to a card player in a game where the others are cheating, and said the decision to quit was justifiable, though regrettable.

Canada's 18 unhappy years as a member of the old International Control Commission accounted in large measure for its reluctance to join the new one. In statistical terms, at least, the apprehension was well founded.

The Record

As of the beginning of this week, the commission had completed its investigation and reports on 120 alleged violations of the cease-fire. Not a single one resulted in a condemnation of the Viet Cong by the Poles or the Hungarians, who repeatedly found excuses bordering on the ludicrous to avoid blaming the Viet Cong for anything.

An explosion in a waterfront restaurant in the Mekong Delta, which Canada and Indonesia found was indisputably caused by a terrorist's bomb, was ascribed by the Poles and Hungarians to a grenade that they said might have floated downstream from a South Vietnamese outpost 200 yards away.

During an investigation into an alleged rocket attack on a school house, the Poles and Hungarians insisted that a crater in the floor might have been dug and therefore could not be used as evidence of shelling.

None of the other three nations have shown an inclination to follow Canada's withdrawal. The Indonesians are unhappy about the work of the commission for several reasons—most notably, their de facto alliance with the Canadians, which they feel compromises their own neutrality.

But they have said repeatedly that they are interested in Vietnam as an Asian problem of importance to them and they would remain here to see it through.

An official of the Polish delegation said yesterday that Canada was using the "divergences of opinion" within the commission as an excuse for a decision prompted by domestic political considerations.

"The Paris agreement envisioned the withdrawal of members," he said. "It won't affect the good relations of our two countries."

Skylab Astronauts Prepare Survey of Nature on Earth

HOUSTON, May 30 (UPI).—Skylab's astronauts beamed back pictures of the sun today and prepared for man's first in-orbit survey of such things as insect infestation in Texas, gypsum beds in New Mexico and volcanoes in Central America.

The initial use of the station's earth resources observation instruments was the major item on the schedule this afternoon. The space agency hopes the cameras and other sensors will lead to new ways man can deal with some problems on earth.

But before Capt. Charles Conrad, Lt. Comdr. Joseph P. Kerwin and Comdr. Paul J. Weitz started the earth resources work, the pilots turned on Skylab's high-powered solar telescopes for the second day and flashed back excellent television images of the sun and its atmosphere.

"We've got a beautiful picture down here," said communicator Henry Hartsfield.

The instrument in use was called a coronograph. It used a disc to block out the sun itself so that the telescope showed visible light rays from the solar atmosphere reaching out more than a million miles—akin to an artificial eclipse.

At one point, Capt. Conrad said he saw a bright object sweep through the image, which he monitored on a television screen aboard Skylab. "It looks like a satellite or something," he said, but Comdr. Weitz said he thought it was debris outside the ship.

While the solar observations were under way, Cmdr. Kerwin started the first test of a man's susceptibility to motion sickness in space. A rotating chair was used and Comdr. Weitz was the subject.

The astronauts began their sixth day in space when they were awakened at 1100 GMT. They said they slept in Skylab's private bedrooms for the first time during the flight.

Cooling Down

"Things are cooling down," Capt. Conrad said. "It could be a little cooler, but I think everybody got a reasonable night's sleep down here."

Comdr. Kerwin reported one problem—sensors apparently failed in a skull cap he wore during the night. The instruments were to measure his brain-wave activity and eye movements to help scientists determine how soundly man sleeps in weightlessness. Mission Control said its received no data and Comdr. Kerwin said the connections apparently dried out.

The main concern of the astronauts was that their main, two-level living and work area was not cooling as fast as they expected under the shade of an umbrella they raised Saturday. Officials now predict temperature will level off around 80 degrees, about 10 degrees warmer than hoped for.

"It's not clear yet what effect that's going to have on our overall operation," said flight director Neil Hutchinson before the crew went to bed last night.

Associated Press.

U.S. Navy's New Machine Sounds Off on Daydreamers

WASHINGTON, May 30 (AP).—Navy scientists have developed a "daydream-warning" machine designed to sound off if a person hooked up to it is not concentrating on the job he is doing.

The machine can help keep airplane pilots, radar and sonar operators and long-distance truck drivers alert, the Navy says.

Prof. Karel Montor of the Naval Academy at Annapolis, Md., where the machine was developed, says in a report that the Navy has no intention of using such machines to see whether midshipmen are daydreaming during studies.

Midshipmen helped develop the machine as volunteer participants in brain-wave research, by occasionally not concentrating on their studies. During the summer of 1972, observations on brain-wave forms were noted to be different among those who were all supposedly studying.

"It became possible to tell when a person who was reading the words of a book was thinking about something else; working on a math problem, but thinking about a girl friend; looking at equipment operating, but thinking about what he would do during his next leave," Prof. Montor said.

Those observations led to the development of an "attention-level analyzer," into which can be dialed the level of concentration an individual should be using plus "an allowable daydreaming factor."

"When the individual exceeds the allowable daydreaming factor, he will be so alerted by a tone. If he continues to daydream beyond an acceptable limit, a second alarm will sound, notifying another person," Prof. Montor continued.

The device still is experimental, but Prof. Montor says the studies thus far have given hope it can be used to keep attention sharp when a tedious or lengthy job is involved.

Zoo Is in Flap After Jet Unit Struts Its Stuff

HUCKNALL, England, May 30 (UPI).—Sherwood Zoo has demanded £800 in damages for deaths, injuries and destruction it says the U.S. Navy's Blue Angels stunt-flying team caused.

As a result of the low-flying display the six Phantom jets gave near Hucknall last weekend, the zoo said:

- A puma ate two of her cubs and refuses to feed a third.
- A rare Formosan sika deer ran into a fence and died.
- Two bison broke out of their paddock and flamingos, lions and Barbary sheep raced around in panic, injuring themselves and damaging fences.

"The animals went completely mad," the curator, Stella Lacey, said yesterday.

The zoo has demanded the money from the Royal Air Force Association, which sponsored the Blue Angels' show.

486 Dead on U.S. Roads

NEW YORK, May 30 (AP).—Traffic deaths during the three-day Memorial Day weekend totaled 486. Estimates put holiday period fatalities run about 25 percent above non-holidays.

Oakland Judge Voids Marijuana Ordinance

OAKLAND, Calif., May 30 (AP).—A county judge ruled yesterday that a newly passed Berkeley ordinance designed to cut down on marijuana arrests is unconstitutional. Berkeley voters adopted the ordinance by popular initiative April 17.

Alameda County Superior Court Judge Lionel J. Wilson ordered the Berkeley city manager and the nine-member City Council to "refrain and desist" from ordering the Police Department to stop making marijuana arrests in the nearby city, site of the main campus of the University of California.

Judge Wilson acted on a petition contending there was "reasonable cause to believe" the Berkeley ordinance conflicted with state law because it required prior council approval for police to make marijuana arrests.

...aining his sentence, the ... told the defendants, "I have ...ive at a method by which ...vernment can get back as ... as possible, whether in se...cret bank accounts or wherever, as long as you live."

The judge said, however, that the men could keep any military pensions and anything they earn as a result of their labor.

There was no immediate estimate of how much in assets the defendants would be required to hand in immediately.

William E. Higdon, whom the judge ordered to turn over his private residence, admitted to depositing over $300,000 in a secret Swiss bank account.

Wooldridge, Higdon and Seymour Lazar were ordered to work for some nonprofit charity for three years, and Theodore D. Bass for one year, all without salary.

All were placed on probation for five years, with suspended prison terms ranging from two to five years.

There was no immediate indication what charities the men would undertake.

Testimony at an earlier congressional hearing revealed that they looted hundreds of thousands of dollars between 1965 and 1969 from clubs for noncommissioned officers in South Vietnam.

The judge closely questioned Wooldridge, Higdon, Bass and Lazar about organized crime, but all denied any connection with it.

Nixon Welcomes Peking Official With 'Good News'

WASHINGTON, May 30 (UPI).—President Nixon welcomed China's first representative to Washington in 20 years today and told him he would like to return to China someday, particularly in the spring.

Huang Chen, the Chinese diplomat, responded through an interpreter: "This is very good news indeed. I will speedily report this to our government."

The Nixon-Huang meeting lasted 25 minutes.

Mr. Huang arrived in Washington yesterday to open Peking's liaison office—a diplomatic mission in everything but name.

Ambassador David K. Bruce opened the U.S. liaison office in Peking on May 14.

Both missions are expected to handle negotiations on many scientific and cultural exchanges, report on political developments and eventually issue visas to tourists.

Concorde Lands, With Passengers, On Only 3 Jets

PARIS, May 30 (IHT).—The Anglo-French supersonic airliner Concorde established another first—unwillingly—today. It landed, with passengers aboard, using only three of its four engines after instruments indicated an engine malfunction.

The pilot, Jean Pinet, said that he decided to shut off one engine as the plane reached the speed of Mach 1.37 after a warning light indicated excessive vibration in the engine. Capt. Pinet said that on-board tests indicated that the warning light was malfunctioning and not the engine, but he declined to take any chances.

After the flight he said that he would have been able to continue the flight to New York on three engines at Mach .93, had it been necessary. The plane could have continued to fly if he had been forced to shut off a second engine, even on the same side of the aircraft, he said.

Airline executives and newsmen were on the demonstration flight, a part of the effort by British Aircraft Corp. and Aerospatiale to impress Western airlines with the plane's capabilities. The passengers were unaware of any malfunction until the captain announced that the flight, scheduled to reach Mach 2.2 and to fly to a point south of Ireland before returning, had been cut short.

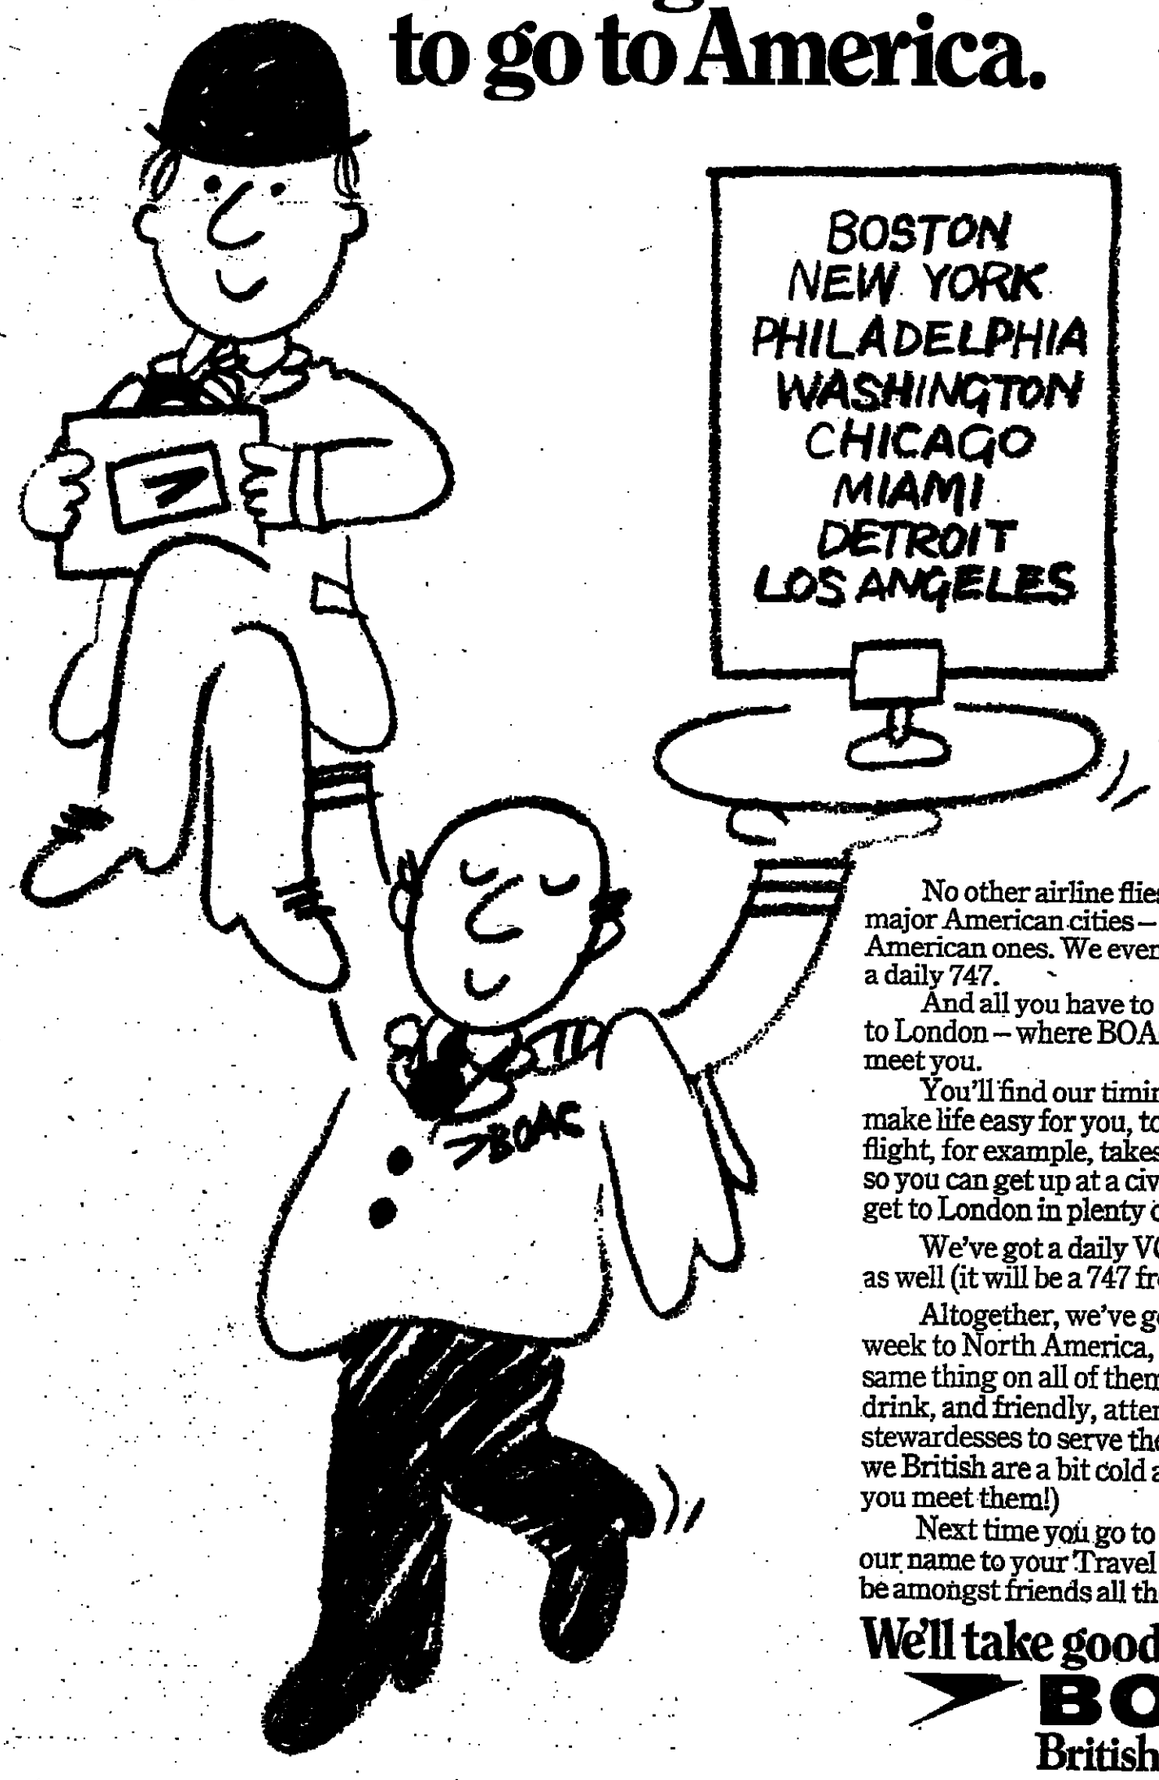

Soviet Attaché Held at Air Show

PARIS, May 30 (Reuters).—The deputy air attaché at the Russian Embassy here was arrested yesterday at the Paris International Air Show after security agents said he had stolen equipment from the French Defense Ministry display.

Lt. Col. Evgani Nikolaevich Mironkin was stopped by security guards outside the Defense Ministry exhibit carrying a packet containing a gyroscope and laser-beam equipment, police said.

French counterespionage agents questioned the officer but let him return to his embassy. Informed sources said the French government is unlikely to press charges, because of his diplomatic immunity, but will ask for his recall to Moscow.

You don't have to go to the Americans to go to America.

No other airline flies direct to all these major American cities – not even the American ones. We even cover Miami with a daily 747.

And all you have to do is to hop across to London – where BOAC will be waiting to meet you.

You'll find our timings are designed to make life easy for you, too. That Miami flight, for example, takes off at 1.00 p.m. – so you can get up at a civilised hour and still get to London in plenty of time to join us.

We've got a daily VC 10 to Washington as well (it will be a 747 from June 3rd).

Altogether, we've got over 80 flights a week to North America, but you'll find the same thing on all of them. Good food, good drink, and friendly, attentive stewards and stewardesses to serve them. (If you think we British are a bit cold and aloof, wait till you meet them!)

Next time you go to the States, mention our name to your Travel Agent. And you'll be amongst friends all the way!

We'll take good care of you.

BOAC
British Airways

Misrepresented in Advertising

FTC Cites 26 Chemical Firms In Sale of Combustible Plastic

WASHINGTON, May 30 (AP). —The Federal Trade Commission today accused 26 chemical firms of knowingly advertising and selling combustible plastics as nonburning or self-extinguishing.

The complaint also named a trade association and a testing firm as defendants.

The plastics involved are cellular, or foamed, polyurethane and all forms of polystyrene and its copolymers. More than one billion pounds of these plastics were marketed in 1972 for use in construction and home furnishings.

The plastics are used for insulation, furniture cushioning and bedding, panels and siding, cabinets, chairs, tables, pipes and lighting and plumbing fixtures.

Airliners and Skylab

They also are used in commercial airliners and in the Skylab space station.

The FTC alleged that the plastics spread flame more rapidly and increase the likelihood of flashover—when a fire in one part of a room suddenly engulfs the entire room or structure. They also generate extreme heat and produce toxic smoke, the FTC said.

It also alleged that the plastics release toxic or flammable gases or chemicals more quickly than other building materials and release more of such gases at various stages of the combustion process.

The FTC complaint alleged that the respondents have known directly or indirectly since 1967 that these plastics constituted serious fire hazards "but have failed to disclose such material facts to users."

It also alleged that the firms misrepresented the combustible plastics as nonburning and self-extinguishing, that the firms had knowledge that the test standards permitting these descriptions were invalid for determining how the products will behave in actual fires and that the firms failed to undertake adequate and effective action to eliminate or minimize risks of injury or damage to life and property.

The FTC asked that the firms halt the alleged misrepresentations, that the use of the allegedly invalid tests for burning characteristics be discontinued and their alleged unreliability be made known to purchasers or users, and that clear warnings be given as to possible fire hazards.

It also asked that the firms set up a program of precautionary, remedial and corrective action to eliminate or minimize the fire hazards in existing installations.

Named as defendants were the Society of the Plastics Industry, Inc., a trade association; the American Society for Testing and Materials, a standards-making organization.

Also named were the following firms:

Companies Listed

Allied Chemical Corp., Morristown, N.J.; BASF Wyandotte Corp., Parsippany, N.J.; Baychem Corp., New York City; Cook Paint and Varnish Co., North Kansas City, Mo., the Dow Chemical Co., Midland, Mich., E.I. du Pont de Nemours and Co., Inc., Wilmington, Del., and Flintkote Co., Inc., White Plains, N.Y.

Foster Grant Co., Inc., Leominster, Mass.; the General Tire and Rubber Co., Akron, Ohio; W. R. Grace and Co., Cambridge, Mass., Hooker Chemical Corp., Stamford, Conn.; Jefferson Chemical Co., Houston, Tex.; Millmaster Onyx Corp., New York City.

Mine Safety Appliance Co., Pittsburgh, Pa.; Monsanto Co., St. Louis, Mo.; Olin Corp., Stamford, Conn.; Owens-Corning Fiberglass Corp., Toledo, Ohio; PPG Industries, Inc., Pittsburgh, Pa., Rohm and Haas Co., Philadelphia, Pa.; Sinclair-Koppers Co., Pittsburgh, Tenneco Chemicals Inc., New York City, Union Carbide Corp., New York City; United States Steel Corp., Pittsburgh, Uniroyal, Inc., Naugatuck, Conn.; the Upjohn Co., Kalamazoo, Mich.; and the Witco Chemical Corp., New York City.

The FTC said its action should not be construed as a blanket condemnation of the use of plastic products in construction and interior furnishings.

Under FTC regulations, the firms now will be given a chance to consent to the commission's proposed relief standards without admitting any guilt on their part.

Abbott Laboratories Sued

WASHINGTON, May 30 (NYT). —Abbott Laboratories, Inc., and five of its present or former officers were indicted by a federal grand jury yesterday in a case involving the sale of allegedly contaminated intravenous fluids in 1970 and 1971. The deaths of nine persons and illnesses of an estimated 350 others were found by federal health authorities to be traceable to the contaminated fluids from improperly sealed containers.

Korean Spy Ring

SEOUL, May 30 (AP).—Two Japanese and a Korean living in Japan have been arrested on charges of spying for North Korea since 1964, Seoul's intelligence agency announced today. Two other members of the spy ring are still sought, it said.

Associated Press.

ALL SMILES—Britain's Princess Anne and her fiancé, Lt. Mark Phillips, at Buckingham Palace yesterday.

'Petrified,' Says Fiancé In Asking for Anne's Hand

LONDON, May 30 (AP)—Princess Anne and her fiance, Lt. Mark Phillips, strolled in the grounds of Buckingham Palace today—she to give a public glimpse of her diamond and sapphire engagement ring and he to reveal what it's like for a commoner to ask for the hand of a queen's daughter.

"I was petrified," said Lt. Phillips, 24, of his formal interview with the Duke of Edinburgh, Anne's father. "But he was very good to me."

His admission of fear drew a smile from Anne, 22, the only daughter of the Duke and Queen Elizabeth and fourth in line of succession to the British throne.

The couple, who announced their month-old engagement yesterday, stood hand-in-hand on a palace lawn, talked easily with court correspondents about their love and future plans and posed for photographers.

A Brief Meeting

Then after another brief meeting with their parents inside the palace, they separated. Anne flew by helicopter to keep a long-standing public engagement at Radnage, a little village in Buckinghamshire near London.

Lt. Phillips left to rejoin his regiment, the Queen's Dragoon Guards, in West Germany. A palace spokesman said it was not known when they would next meet.

Earlier at a private lunch in the palace, Lt. Phillips introduced his parents, Mr. and Mrs. Peter Phillips, to the queen and her husband.

Princess Anne said she expected to get married "sometime in the middle of November." She explained: "It still has to be decided because with a family such as ours, we have public engagements [scheduled for] months before."

Asked where she would like the state ceremony to be held, Anne replied: "It's difficult. There are lots of things which have to be taken into account."

Asked when she decided the romance was serious, Anne said: "I suppose after the Badminton horse trials in April." Lt. Phillips agreed. They admitted it had been a strain keeping the engagement a secret.

Close friends said the engagement was not announced immediately because the couple wanted time to share their happiness privately before publicity burst on them.

Harvesting Bumper Crop

Afghan Farmers Grow Opium on Land Reclaimed by U.S.

By Bernard Weinraub

KABUL, Afghanistan (NYT).—Afghan farmers are harvesting a bumper crop of opium poppies on newly irrigated land that has been developed with foreign aid.

American officials, who have sought to put pressure on the government to curb the growth and outflow of opium, are furious and embarrassed because the land was developed by the aid mission here to spur food production. Instead, Afghan farmers have grown opium because of the fast and easy profits.

"They're harvesting the biggest crop of opium ever in the Helmand Valley," said one source, referring to the southwest desert area where the United States supports a vast new reclamation project.

"They've abused what we've given them," he said. "Land that had nothing growing before now has blooming poppies."

Another official said simply: "No crop can compete now with the poppy. It's easy to grow, easy to sell and there's an infinite price range you're working against."

Because of restriction on poppy growing in Iran and Turkey, this remote mountainous kingdom has rapidly emerged as a lucrative poppy market. Prices to farmers for opium poppy "gum"—which is later processed into morphine and heroin—has quintupled in three years.

Officials say bluntly that the Afghan government has made little attempt to curb the growth of opium poppy or punish farmers, traffickers and smugglers.

With the harvesting season across the country now at its peak, farmers are receiving $25 to $35 a kilo for poppy gum. It takes about 10 kilos of gum to make one kilo of heroin. A kilo of heroin in New York is now worth about $40,000. The opium grown here is said to total 100 tons a year. Most American officials believe, however, that opium production is considerably higher and may now reach 300 tons.

Controls of poppy production in the U.S.-sponsored project are extremely difficult, largely because the area covered is sizable, more than 360,000 acres, and the government has been reluctant to concede that opium growing is a problem. Moreover, this is the first year that opium has been grown on land developed by foreign aid that was intended to increase food production.

There are three main opium yielding areas of Afghanistan. One is in Badakhshan, in the northeast tip of the country, where roads are inexistent. Here nomad tribesmen and farmers haul their opium by camel and donkey to towns and sell it to local businessmen, who represent large opium merchants, many of them politically powerful.

A second area is in Nangarhar, near the Pakistan border, where the Soviet Union has a big land reclamation project. Some Western officials believe that farmers in Nangarhar have used Soviet technical assistance in the same manner that they have used the American to produce more opium poppies.

The third area is the Helmand-Arghandab Valley in the southwest, where between $18 million and $20 million in aid funds has been spent to help set up a vast land development project. U.S. government loans are also helping to build a hydro-electric plant and a set of irrigation systems.

American officials with the valley project say that it has vast potential, partly because of the year-round water supply. Some officials compare the project, on a lesser scale, with the Tennessee Valley Authority and say it could emerge as one of the major agricultural complexes in South Asia.

But officials maintain that the Afghan government's refusal to discourage poppy production has led thousands of farmers to grow opium instead of wheat, grapes or other crops.

Obituaries

Sir George Harriman, 65, Head of British Leyland Mot

LONDON, May 30 (AP).—Sir George Harriman, 65, president of the British Leyland Motor Corp. and former chief executive of the British Motor Corp., died yesterday at his home in Knowle, Warwickshire.

Sir George, whose father was an executive of Morris Motors, sought to end the auto industry's long dispute with organized labor by urging the creation of a single trade union for the industry to replace the current fragmented union setup.

He warned the government five years ago it should help achieve this because "it is obvious there is a nationwide breakdown of responsibility and discipline—a form of creeping anarchy."

He suggested in that 1968 speech that where anarchy was involved, government must also be involved, "for if it is not stopped, we shall be facing not only the devaluation of sterling but the devaluation of Britain."

In July, 1971, he headed a new firm of international consultants established to advise firms within the Common Market on ways to improve profits. Their first clients included three West German companies.

He then said that he was not preparing to leave British Leyland, but he wanted to "keep my mind and body active." Sir George was knighted in 1966.

Harry H. Greer Jr.

POUGHKEEPSIE, N.Y., May 30 (AP).—Harry H. Greer jr., 62, a retired Navy captain who commanded the submarine that mapped the Japanese minefields in Tokyo harbor during World War II, died Saturday at his home.

Capt. Greer earned the Navy Cross, the Navy's highest decoration, for leading the Seahorse into Tokyo harbor in 1945 to locate the mines planted by the Japanese. The exploit enabled a task force of American submarines to enter the harbor and sink enemy ships.

A graduate of the U.S. Naval Academy in 1934, Capt. Greer served in the Navy until 1964, when he became an educational researcher for the International Business Machines Corp. here.

John Bogan Sr.

POINT PLEASANT BEACH, N.J., May 30 (AP).—John Bogan sr., 90, a sea captain who rescued 67 people in the 1934 Morro Castle fire, died at his home here Sunday.

Mr. Bogan was the operator of his own six-vessel Paramont Fishing Fleet at Bogan's Basin in Brielle.

The rescue came on the morning of Sept. 8, 1934, when Morro Castle burned off A Park. The disaster claime of the 555 passengers and

Air France introduces Tokyo-Tahiti-Lima.
It's all we needed to fly you completely around the world.

Usually it's no big deal when we launch a new route. After all, the Air France network covers 472,000 kms, flying to 154 cities in 75 countries throughout the world.

But Tokyo-Tahiti-Lima, that's another story. It provides a direct link between South America and the Orient. And permits our network to circle the globe.

So now it's just that much easier to schedule connecting flights for business anywhere in the world. And in addition, to sample the delights of Tahiti along the way.

ael Willing to Confer ith Bourguiba on Mideast

USALEM, May 30 (AP).— announced today that it is to accept Tunisian Presi- Habib Bourguiba's offer to the Middle East conflict. ign Minister Abba Eban nced Israel's agreement a after Mr. Bourguiba said in terview published by an newspaper that he was to meet with "peace-mind- aelis."

Eban's announcement dur- parliamentary discussion on foreign policy reversed his eaction when he said Mr. uiba "was not serious."

Eban said that, at first, he bought Mr. Bourguiba was g to mediate Mideast peace efforts. An Arab mediator would not suit Israel, he said, adding that the Israelis have long said they were ready to talk peace at any time with any Arab leader.

"Naturally, the government of Israel agrees to hold a meeting with the president of Tunisia, and we will be interested to learn the thoughts of President Bourguiba as to the time and place for the encounter."

Suggests Negotiation

Since 1962, when he became the first Arab leader to suggest a Mideast settlement by negotiation, Mr. Bourguiba has been regarded here as the one crack in the wall of Arab hostility toward Israel.

It is known that at one time, the Israeli government even worked behind the scenes in the hope of getting the Nobel Prize Committee to award the Tunisian leader a peace award.

Thus, Mr. Eban was sharply criticized by leftist deputies in parliament earlier this week for seeming to brush off Mr. Bourguiba's latest offer.

Mr. Eban said he had been misled by a state radio report quoting Mr. Bourguiba as offering to mediate.

"We have made many efforts over the years to nurture the possibility of a dialogue with Arab leaders, including Tunisians, and every time this opportunity failed to come about, it was not our fault," he said.

Mr. Eban then turned to yesterday's resolution of the Organization of African Unity—which threatened political and economic measures against Israel unless it altered its policies.

He noted that the OAU had resisted Arab demands that it take immediate steps against Israel, but registered Jerusalem's "dissatisfaction" at the OAU's censure.

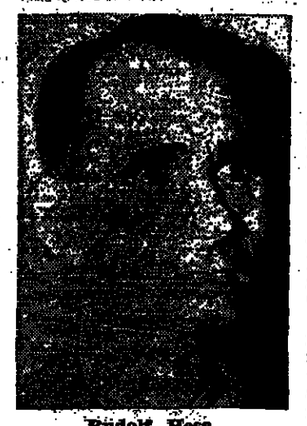

Not Given Opportunity

He said the resolution was reached in the presence of Arab delegates while "the other side in the struggle was not given the opportunity to have its say or explain its stand."

Mr. Eban said it was "an African tradition to solve disputes by dialogue. We must note sadly that the OAU does not apply this principle to the Middle East." He added:

"We will continue to explain the justice of our policy to those African leaders who want to continue the friendly dialogue with Israel."

Mr. Eban said Israel would maintain its aid to "any African country that asks for it, and there are many. We will do so amid frank debate with them and without concealing our opinion of the resolutions reached under the influence and pressure of Arab governments."

Rudolf Hess

Ex-Censor at Spandau Feels Hitler Ordered Hess Flight

WEST BERLIN, May 30 (Reuters).—The British censor for 18 years at the four-power Spandau Prison here said today that Rudolf Hess flew to Scotland in May, 1941, on Hitler's orders.

John Hartman, who met hundreds of times with Hess while working at the prison, discussed his theory in an article published in the West German magazine Quick today.

Mystery has surrounded the flight that Hess, Hitler's deputy, made to Britain a month before the Nazis invaded Russia. He said at the time he sought to make peace with Britain.

"Hijacking is a modern sickness in the world," Mr. Hartman is quoted as having said to Hess in one of their frequent conversations. "It never used to happen," he added.

Hess replied: "No, that is true."

Mr. Hartman went on: "I assume that the term hijacking would not apply in your case."

Hitler's deputy replied: "You could put it that way."

The Tone Is Vital

Mr. Hartman continued: "The words may not be too clear in cold print but in the tone in which they were spoken I regard them as an acknowledgment that his flight was not unauthorized."

Mr. Hartman retired as censor at the prison last year. He said he believed Hitler chose Hess to make the flight and offer peace because, if the mission failed, Hess was so loyal he would never have betrayed Hitler's role.

Two Germanic Peoples

Quick supported Mr. Hartman's theory in an interview with Gustav Adolf Lenk, 70, founder of a Nazi youth movement, Jungsturm.

It quoted Mr. Lenk as saying he spoke with Hess at the end of April, 1941. "You know that the Fuehrer wants no part of a war with England," Hess reportedly told him.

"Even today he says that it is a tragedy that the two Germanic peoples should fight each other. He would like to finish it, then he could put an end to the danger from the East."

Mr. Lenk said that this conversation led him to conclude without doubt that Hess was acting on Hitler's orders when he flew to Britain.

Mr. Hartman also urged that Hess, now 79, be released from Spandau, where he has been the sole inmate for the last seven years.

Britain, France and the United States are willing to free Hess, but the Russians have refused to consider such a move.

17 Flee U.K. Jail, All but 2 Caught Just Outside Gate

LONDON, May 30 (AP).—Seventeen men broke out of Brixton Prison here today, but 15 were recaptured outside the gate after bloody battles with police.

A witness said several prisoners were "smothered in blood" after the clash with police dogs and officers wielding clubs. Nine policemen suffered minor injuries.

The men escaped by overpowering a guard and stealing his keys. They ran into a prison yard, dragged the driver out of a garbage truck and rammed the vehicle through a prison gate.

Soviet Flier Gets Asylum by Bonn; Reason Secret

BONN, May 30 (UPI).—West Germany today granted political asylum to a Soviet fighter pilot and declared the grounds for its decision to be "confidential."

The move rejected Moscow's demand that the pilot be extradited and put some strain on the "new era" of Soviet-West German relations established only a week ago by Leonid I. Brezhnev's visit to Bonn.

A government spokesman, Armin Gruenewald, said West Germany had agreed to grant asylum to Lt. Yevgeny Lvoich Vronski, who flew his Sukhoi-7 fighter-bomber across the border from East Germany on Sunday and bailed out. He was misidentified by the government yesterday.

Mr. Gruenewald said the West Germans were returning the wrecked aircraft to Soviet representatives. He declined to answer questions concerning the pilot's motives or the government's judgment in his favor.

"Our talks with him were confidential, and I cannot break this confidence," Mr. Gruenewald said.

N.Y. Trains Blocked Hours by Tunnel Fire

NEW YORK, May 30 (AP).—Firemen led 500 trapped commuters to safety through a smoky railway tunnel beneath Park Avenue last night as an engine fire cut off service at Grand Central Station for several hours during the rush hour.

Thousands of outbound travelers and commuters waited in the huge terminal and inbound passengers debarked miles from midtown.

Firemen fought the blaze in the tunnel until the railroad succeeded in hauling the crippled engine to above-ground tracks. The fire was then extinguished.

About 25 firemen received hospital treatment—one for an eye injury and the rest for smoke inhalation. Firemen in the tunnel worked in oxygen masks.

Tory Ex-MP Named Governor of Bermuda

LONDON, May 30 (AP).—Britain yesterday named Sir Edwin Leather, 54, to be the next governor of Bermuda, succeeding Sir Richard Sharples, who was shot dead in March in the grounds of Government House.

Sir Edwin, a Conservative member of Parliament from 1950 to 1960, was also chairman of the National Union of Conservative and Unionist Associations from 1969 to 1970. He resigned from the Commons because of his health.

"EUROBANKING."

Eurobanking is more than a coined word. It is a specific and dynamic new dimension in banking that is the special capability of Citibank/Europe.

Citibank/Europe is not a loose federation of Citibank branches that just happen to cover Europe geographically. It is a cohesive and coordinated banking system with a scope and viewpoint that are pan-European, rather than provincial. And with the flexibility to apply whatever skills and resources the needs of a multinational company call for, wherever those needs exist.

Eurobanking, as we practice it at Citibank/Europe, means strength—the full lending capacity of the world's leading international bank. It means creativity—bold new banking ideas and concepts geared to contemporary corporate needs. (Examples: coordinated multicurrency loans, our global money transfer system, international corporate cash management programs.) Above all, it means *banking without boundaries.* Throughout Europe and beyond—extended, around the world, by Citibank's branches, subsidiaries and affiliates in 92 countries, on 6 continents.

Eurobanking—and Citibank/Europe. They go together.

Ending Soviet Isolation

In his Bonn speech extolling East-West *détente*, *Leonid I. Brezhnev* spoke for growing openness in Moscow's global relations. "Our course," he said, "is not toward isolating our country from the outside world. On the contrary, we proceed from the fact that it will develop under conditions of growing cooperation with the outside world, and not only with socialist countries at that, but in considerable measure with the states of the opposite social system as well."

If that aspiration is to be realized, and relatively quickly, the press inside the Soviet Union, and everywhere else, will have to have all the freedom of access it needs to fulfill its mission as the eyes and ears of millions of ordinary citizens. In the past and, unfortunately, even now, American correspondents assigned to Moscow have been severely limited in their ability to experience and then to convey to citizens here the full reality of Soviet life throughout that vast country. Soviet correspondents in the United States also operate under certain limitations, though these are far less restrictive. To end the isolation of Soviet citizens and Americans from one another, correspondents in both countries should be far more numerous than they are now, and have the fullest possible freedom to travel and to contact officials, institutions and the public.

Mr. Brezhnev can help give reality to his hopeful words by issuing appropriate orders. Washington, too, can help by lifting existing restrictions. A formal agreement extending and protecting the professional rights of Soviet and American correspondents would be a useful result of the next summit meeting.

THE NEW YORK TIMES.

Dollar-Free Politics

If there is one subject that has been studied, argued and microscopically analyzed for decades, it is the reform of American political campaign financing. It does not need another commission to start from scratch and come up with a report for stimulating congressional action, especially in the full tide of Watergate.

President Nixon would have the question included on the agenda of a commission he proposes setting up to deal with the whole broad question of electoral reform. But a number of pertinent *bills are already* pending in Congress, which rightly show little interest in Mr. Nixon's proposal for a new study group. Three of these measures, introduced jointly by Republican Sens. Scott of Pennsylvania and Mathias of Maryland, would centralize administration of the Federal Election Campaign Act of 1971 under an independent commission with full power to investigate and prosecute violations. The bills also would repeal the broadcasting "equal time" requirements, which now seriously inhibit campaign debating by television, and allow candidates several political mailings at reduced postage rates.

Sen. John O. Pastore, D., R.I., would make *similar changes and extend present limits* on campaign spending, now confined to the media, to all forms of campaign expenditure. House bills are similar in nature, some going further to strengthen those disclosure provisions which have already served to trip up leading figures in the Republican Committee for the Re-Election of the President.

All these legislative efforts are commendable as logical extensions of the 1971 law, which went in the right direction if not the necessary distance. But, even without the new rash of scandals, more and more authorities in the field have been approaching the belief that reform cannot be carried much further as long as the electoral system rests on the financial bedrock of private campaign contributions. In its very nature this system breeds the kind of bribery and extortion that flowers in "laundered" money bags, higher milk prices in exchange for financial gifts from dairymen and interventions with regulatory agencies for the benefit of fat-cat contributors.

Sen. Phillip A. Hart, D., Mich., has zeroed in on the subject with a bill that makes precisely this approach to the problem, though regrettably not on the presidential level. He would try it out first on candidates for Congress. His bill is tentative in other respects as well. It would not preclude private campaign money altogether, but merely give a candidate the option of being financed by the Treasury, on certain conditions, or getting his campaign funded in the traditional manner. Among the stipulations would be an over-all spending ceiling for recipients of government funds, regardless of whether or not legislation is passed to impose such limits generally.

Despite its modest scope, the measure is highly significant. A tax check-off now permits citizens to direct a tiny fraction of their payments into electoral channels; the Hart bill would guarantee to a candidate, out of public funds, an amount adequate to conduct a full-blown congressional election campaign. There is need, however, for clearer answers on how to iron out the constitutional problems, *not to mention* the equities, involved in discriminating between major and minor parties and in fixing standards that candidates would have to meet to qualify for public financing of a primary campaign.

We are convinced, nevertheless, that the hope for a cleaner politics lies in this direction. Presidents since Theodore Roosevelt have endorsed the concept of public subsidies for election campaigns, none more *eloquently than Lyndon B. Johnson*, who rightly thought the whole sordid process of begging and wooing by would-be Presidents demeaning to the office. Worse than demeaning, it is corrosive, as recent events have all too persuasively demonstrated. Sooner rather than later, American campaigning must be freed from the corrupting influence of private money.

THE NEW YORK TIMES.

Fog Over San Clemente

President Nixon has done a good deal but, regrettably, not enough to dissipate the swirling fog of confusion he allowed to arise over the financing of his estate in San Clemente. To clarify the questions left obscure by last week's White House statement and the subsequent explanations of a presidential spokesman, an auxiliary statement is much in order.

That statement could best come from Robert H. Abplanalp, the wealthy New York businessman who played a pivotal part in the transaction. It would help if he made public all the circumstances of his role in the original purchase of the estate in 1969 and the names of other participants, if any, in the private company he established to buy the greater portion of the land a year later. Such disclosure is all the more important since there are no public documents on file reflecting the reported division of the property in 1970 and since Mr. Nixon's public statement of net worth in last year's campaign apparently did not state accurately the size of his indebtedness. To add to the unanswered questions, the sum spent directly out of the government treasury is reportedly at least triple the amount the White House reported investing at San Clemente to safeguard presidential security.

High public officials, unlike private persons, have to make public their private finances because they are responsible for managing huge sums of taxpayers' money and because their official decisions affect the course of many business and financial developments. It is therefore essential that all citizens have confidence that high public officials are under no untoward financial pressures or compromising influences.

It may be embarrassing for the President to acknowledge publicly that he is heavily in debt to a single wealthy friend, but the truth is always easier to live with than the deliberate mystification with which the White House had originally surrounded this subject. Now that it has begun to dispel this fog, the White House must go all the way and get the rest of the facts on the record. There would still remain substantial concern over the propriety of Mr. Nixon becoming so heavily indebted to any private individual, *even if he is a close friend and* uninvolved in government contracts as Mr. Abplanalp appears to be. A President or any other public official is in a stronger position when he avoids such private entanglements.

In the International Edition

Seventy-Five Years Ago

May 31, 1898

PARIS—*The Herald has just made* an important innovation by introducing the Linotype typesetting machine, familiar enough in America but hitherto unknown in France, into its Paris office. And a wonderful machine it is. It seems more than human and is apparently endowed with brains as well as an enormous capacity for mechanical work. There are six in a row. The motive power is electricity, which besides making the machine act quickly and cleanly, does nothing to foul the air.

Fifty Years Ago

May 31, 1923

PARIS—*Memorial Day was observed once again* in Paris and throughout all of France with impressive ceremonies in honor of the American dead of the Great War. There were heartfelt tributes to their self-sacrifice to the cause of civilization. And the worldwide significance of the occasion was more than ever marked by the sympathetic association in the solemn observances of representatives from all the Allied countries of Europe and the rest of the world.

'It's GOT to Crest Soon.'

The Trials of Ronald Ziegler

By James Reston

WASHINGTON—One of the mysteries around the White House these days is why Ron Ziegler remains as the President's spokesman rather than being called to testify before the grand jury and the Ervin committee on the Watergate case.

For an official who has lost the confidence of his audience to continue speaking for an administration that needs more than anything else to restore confidence is a puzzle, but what is more puzzling is why he has not been asked to explain who instructed him to give all the misleading answers to questions put to him at the White House.

In the first place, there is an element of unfairness in his present exposed position. Unlike his predecessors in this savage job—Jim Hagerty under President Eisenhower, Pierre Salinger under John Kennedy and Bill Moyers and George Reedy under Lyndon Johnson—Ziegler has never had any real freedom to interpret the substance or even the tactics of President Nixon's actions.

A Recording

He was brought in, unlike the others before him, not to interpret the President to the press and vice versa, but merely to put out what he was told to put out. He was a guided propaganda missile from the first, or, as somebody put it better, he was "a recorded announcement."

Apparently, at 29, when he first took over, he liked this role as his master's voice, but it has led him into all kinds of distortions during the Watergate year, and every day now he is little more than an official punching bag for the people he misled.

Aside from the fact that he himself is now "inoperative" as a believable official spokesman, the main question, about which so many other Nixon associates have been called before the investigating committees, is: Where did he get his instructions? Who told him to dismiss the Watergate as "a third-rate burglary attempt" or to say that "the White House has no involvement whatever in this particular incident"?

If one of the purposes of all these investigations is to find out whether there was a cover-up in the White House or an obstruction of justice, Ziegler is probably in a position to know at least part of the answer.

Every day, Patrick J. Buchanan, of the White House staff, prepared a digest of newspaper, radio and television news reports and *commentaries. This went to the* President and key members of the White House staff, and was used as the basis for anticipating the questions that would be asked by reporters at each day's White House press briefing.

Someone Decided

When the Buchanan digest contained day after day for months the published reports on Watergate leaks or developments, somebody had to decide what Ziegler was to say in denial, confirmation or rebuttal.

In Hagerty's or Moyers's days in the White House it might be conceivable that they would undertake to face the firing line on their own, since they were filled in on the substance of policy and trusted to know better than anybody else how to react in tight situations to an inquisitive press. But this was not the way in the Nixon White House.

Few subjects concerned the White House staff more than the protection of the President from rumors, false or true. No administration in memory has used the official White House denial nearly as much as the Nixon administration, and the obvious question, since Ziegler seldom acted without instructions, is who gave the word?

More important, on particularly embarrassing questions, requiring precision, or more likely carefully calculated imprecision, were the official answers written out and, if so, by whom?

Answers to these questions should be instructive. A catalogue of Ziegler's answers is on the public record, along with his apology for his incorrect answers, which he said were "inoperative," and he is not likely to explain how or where he got his answers unless he is called to testify under oath.

Meanwhile, he goes on putting out statements condemning the federal prosecutors for what he calls their "shocking and irresponsible abuse of authority" in saying that there was justification for calling on Nixon to testify before the grand jury, "if in fact they made the statements attributed to them."

Whose Denial?

In short, he charged the prosecutors before checking on whether they had actually made the statements he was condemning. But again: Who authorized his denial?

Ziegler has been put in a false position from the start, asked to handle subjects with which he had little familiarity, armed with answers to opening questions, and then left stranded to fend off the inevitable follow-ups.

In the process, his usefulness has been steadily eroded, but he is still out there taking his lumps every day with more patience and courtesy than ever before. The Watergate was his Waterloo, and he must know it, but he is still taking the rap for other men.

Crimes of State

By Anthony Lewis

BOSTON.— On 85 successive days now, without any authority in law, American planes have bombed Cambodia. The latest official figures, for April, showed that the average daily tonnage had risen to nearly one and one-half the amount dropped on North Vietnam during the Christmas bombing campaign.

Not surprisingly, the bombs dropped by B-52s and fighter-bombers actually kill people and destroy their village civilization. A New York Times correspondent, Sydney Schanberg, recently filed an impressively meticulous account of what the United States has done to Cambodia in these last months.

"Sometimes the devastation is continuous for several miles," he wrote of a trip along a road from Phnom Penh. "Ashes, broken cooking pots, shattered banana and mango trees, twisted corrugated iron roofing and sometimes the concrete stilts of a house reaching toward nothingness—that is all that is left. A few people wander forlornly through the rubble.

'Wanted to Cry'

"'When I came back to my village,' said a farmer from the destroyed village of Svay Meas, 'there was no sound. No people. No children. Not even a dog. It was all quiet. I wanted to cry. Everybody wanted to cry.'"

Cambodia is a small peasant country in a faraway place, and few Americans know or care much about it. But we might care about the reputation the United States is acquiring as the country that over the last decade has killed more innocent people and destroyed more homes and crops than any other. And above all, at this time of heightened constitutional sensibility, we should care about what this lawless war-making is doing to our own institutions.

Even President Johnson, when he began bombing North Vietnam in 1965, did not do so as an act of naked presidential fiat. By whatever means he had persuaded Congress to provide it, he did have the authority of the *Tonkin Gulf Resolution* to attack North Vietnam. Indeed, he was so conscious of the problem of authority that he used to keep a copy of the resolution in his pocket and bring it out when he was asked questions about the bombing.

There is no Tonkin Gulf Resolution anymore; with the agreement of President Nixon, Congress has repealed it. There is no other law that anyone has interpreted to authorize war on Cambodia. The United States is not party to any treaty covering that country. It may be reiterating the obvious to say so, but there simply is no basis in law for the current bombing.

The lawyers of the U.S. government have made no serious effort to justify the war on Cambodia in terms of the U.S. Constitution and laws. The one person I know who has is Prof. Eugene V. Rostow of the Yale *Law School, who tried the other* day in The New York Times. His argument was an object lesson in self-destruction.

It is an "inappropriate moment" to stop bombing Cambodia, Prof. Rostow argued. We cannot "assure the security of South Vietnam" unless we get "hostile forces" out of sanctuaries in neighboring countries. The Cambodian government, like others, is entitled to call in others for help in collective self-defense.

As a matter of military policy, those arguments would doubtless persuade some people. But inconveniently, the U.S. Constitution does not confide such judgments to the President. The power to declare war is committed to Congress.

How sad it is to read such stuff from a man who once understood that the end cannot justify the means in this country, that the Constitution is for bad times and good. Eugene Rostow was eloquent when he fought the internment of Japanese-Americans in World War II. Now he tells us that it would be "constitutionally irresponsible" to stop the President from waging his own war.

Congress is at last moving to stop the unlawful American destruction of Cambodia. But as it does, it must beware of an effort by the President's men to reverse the constitutional burden of proof. They want the Constitution to read: "The President may wage war unless Congress stops him." But it does not say that. It does not put on Congress the burden of overcoming inertia, and possibly overa veto, it is up to those who war to obtain congressiona thorization.

Ideals Corrupte

What has gone on the 85 days is in its way mo ous than Watergate, mo pressing in its demonstra how far we have gone corruption of our consti ideals. For the most men in our government—l policemen and political men—have carried out they well knew were

Like Adolf Eichma argue that they w lowing orders. But States, no superior ful if it is in fact by the Constitution

Law students l that killing witho thority is murder. escaped the Whit sistants and Penta Department official carried out the Presi stitutional orders to bodia. Thoughts on Watergate

Some Inverted 'Logic

By David S. Broder

WASHINGTON.—How does a sensible person collect his thoughts about a situation like the Watergate? How do you navigate rationally in a world in which the FBI director is the man who destroys the vital evidence and the President's closest advisers are depicted as those who supposedly told him least of what he really needed to know?

One antidote for the mind-blowing tendencies of the Watergate revelations is a book being published this month by Charterhouse, It has the implausible title, "The Institutional Imperative: How to Understand the United States Government and Other Bulky Objects."

The author is a Washington lawyer named Robert N. Kharasch. He has been a friend of mine since college days, which is why I read the book early, but not why I recommend it to you.

Tool of Reason

The *recommendation comes* because Kharasch has applied the tool of reason to the phenomenon of government and laid bare, in chilling terms, the kind of inverted "logic" that can lead to a Watergate.

It is a bitterly funny book, but also a dead-serious one, and nowhere does he cut closer to the truth than in discussing the fixation with "national security" which the President has now invoked as the principal defense of his conduct in this case.

Kharasch is not the first student of organizational behavior, by any means, to note the organization man's fascination with secrecy and security. He quotes sociologist Max Weber's familiar comment that "every bureaucracy seeks to increase the superiority of the professionally informed by keeping their knowledge and intentions secret... The concept of the 'official secret' is the specific invention of bureaucracy and nothing is so fanatically defended by the bureaucracy..."

It is only this fanatic institutional commitment to secrecy, Kharasch observes, that can possibly explain the political anomaly of a Republican administration trying desperately, in the case of the Pentagon papers, to prevent publication of historical documents damaging to its Democratic predecessors.

State Secrets

But Kharasch has a further point to make. The Watergate case had not broken when he finished his manuscript last year, but his words provide a striking commentary on the elaborate scheme of special White H "security organizations" Mr. H revealed last week and on "state secret" defense the P dent used in explaining his p tantly admitted interventio last year's Watergate inve tion.

"An office of personnel se *shares with an office* class documents the power of cr of the subject matter upon it operates," Kharasch writes is not generally the case for ernment agencies. "The co and chauffeurs license bure issue no licenses unless som plicant appears to colf or a court will try no cases some plaintiff sues."

But security offices—esp White House security office *different*. "Security o Kharasch notes, "can dec find security risks, whic keep the machinery wo Since the imperative of ev stitution, as he sees it, keep the institution's mac working... the special law security office (is that) to security will be found.

The corollary, in logic a perience, is this: "The fin threats to security by a s office is totally predictabl hence the finding is totally less. Heretics, witches, s risks. Commies, crypto-cu revisionists and enemies of man Mao may or may n but the announcement o discovery is meaningless, United States, in Russia, in in the past, present or

Creating News

One further logical ste Kharasch to declare as "a *law of institutional self-c* tion" that "if an institut generate the subject matte operations, it will." An example: In dull times, papers will create news covering "crises" that in periods would go unreport

A more significant but obvious extension: A gove that can invoke extraor powers in time of nationa gency will have no troub covering the existence emergency. As a matter Kharasch notes, none of Truman's successors has to revoke the declaration tional emergency he issued time of the Korean war.

Mr. Nixon has just pro own readiness to obey t stitutional imperative" by facturing a threat to n security in order to justify ermental coverup. We e pect more of the same in to come.

Natural Good Taste

Grist, a favorite in Vienna ...everywhere else she sings, ...t matter), was a delicious ... sharp-witted and tender, and with the natural good taste to be repelled by Eberhard Wächter's scruffy patent-medicine peddler. Vocally and physically, she seems to do everything with such natural ease that she really is Adina (or Zerbinetta, or Susanna). When she was not playing Gedda's Nemorino on one line, it was Robert Kerns's blowhard Sergeant Belcore on the other. Kerns fit his part like a glove, too, with his solid baritone swaggering along with his body.

Wächter, a fine baritone and a convincing actor, would have made a good Belcore too, but he is not a *Basso Comico* and not a Dulcamara. The rapid-fire Italian of his sales pitch did not come tripping off the tip of his tongue and Schenk gave him very little in the way of characterization but a disconnected collection of vulgar mannerisms. Even the "Bordeaux" he was dispensing as a cure-all looked more like cherry soda, or at best a cheap Basque rosé.

Jürgen Rose's single set was a lovely country house covered with flowers opposite a convincing farm building and very real cobblestones in between.

Silvio Varviso drew some fine playing from the Vienna Symphony Orchestra and conducted a fluid and lively performance and the Vienna Academy Chorus acquitted itself handsomely; both vocally and in their busy stage movements.

One might wish that Schenk had edited out some of his more obvious comedy and trusted the music more, but it is only fair to add that the audience at the second performance last night lapped it all up and rewarded everyone with an ovation.

Keri Grist (left) as Adina and Nicolai Gedda as Nemorino in "L'Elisir d'Amore."

Princess Dina's Sensual Arabesque

By Naomi Barry

LONDON, May 30 (IHT).—The queen is in the Counting House and Lady Karen Beeley is running the store.

The store is Arabesque, flourishing oasis of the Middle East in the heart of London's Belgravia section. The owner is Dina, former queen of Jordan and first wife of King Hussein.

Princess Dina (she was born a princess of the Hashemite Kingdom) resumed her original title after the divorce. She is married again and lives in Cairo, from where she keeps in weekly telephone touch with the merchandise needs of Arabesque. Four or five times a year, she comes to the shop but her small, modest figure rarely is recognized.

Princess Dina toow up absentee storekeeping for several reasons. She was educated in England and was anxious to keep up her sentimental attachment to the country. Furthermore, she was moved to help materially the women of the Middle East. London seemed a natural outlet for them to earn a little more money for their exquiste embroidery and handicrafts.

An old friend, Lady Beeley, a stunning half-Irish, half-French brunette whose husband was a member of the British diplomatic corps, agreed to manage Arabesque. From her Cairo base, Princess Dina scouts the Middle East for merchandise glamorous beyond the pick of the souks.

Dresses Stand Alone

The wives of the fellahin of Galilee, Samaria, Judea and the Mediterranean coastal strip have a long tradition with the needle —appliqué, patchwork and geometric patters of cross-stitch. Some dresses are so stiff with embroidery that they can practically stand alone. Southern Palestine went in for cross-stitch. Bethlehem specialized in free-flowing leaf and flower motifs. Coins are sewed onto clothes in ways that vary according to the region.

Princess Dina's suppliers for the London operation mainly are women working as artisans at home. However, the sophisticated gilt chain and antique coin necklaces designed by a young Egyptian girl are made up in a Cairo atelier.

Keystone.

Dress from Arabesque

What you will find at Arabesque is not fashion per se, but a mood and a wealth of precious handicrafts from Lebanon, Iraq, Egypt, Jordan and Turkey. The clothes are timeless, they span the centuries. The interior of the shop is a richly hung tent. In addition to the clothing, jewelry, small carpets, lamps, and accessories add that aura of year-round seduction that made a best-seller of Lesley Blanch's "Wilder Shores of Love."

Few areas of the world have created a more alluring after-dark look for its women than the Arab lands. The evening costumes are a cocktail of slither, come-hither and modesty. If you have a good figure, it will be beautifully suggested. If you do not, the embonpoint will be discreetly hidden. Should the latter be the case, a stylish stout still can glide forth like a sensual odalisque by concentrating on the eye makeup and the jewelry. No matter what the underlying structure, the clothes will be deliciously comfortable.

For the London clientele, Princess Dina has instructed her handmaidens that they may occasionally plunge a décolleté that nobody would dare at home.

ARABESQUE. 12 Motcombe Street. London, S.W. 1.

Casals Festival

SAN JUAN, Puerto Rico, May 30 (UPI).—Pablo Casals conducted Mendelssohn's "Fingal's Cave" overture last night to open the nine-concert Casals Festival here. Casals, 96, is reported to be fully recovered from an asthma attack which prevented him from appearing last week in Washington. Last night he conducted from a high stool which he has used in the last few years.

WAVERLEY ROOT

Caribou—An American Reindeer

THE caribou is not usually considered nowadays as an important food animal—except by that small minority of the world's population which lives in Arctic regions—but it can be maintained that if it had not been for the caribou, man would have been eliminated from the Northern Hemisphere by starvation thousands of years ago. No other Arctic animal has ever been so closely associated with man. "A relic species from the Ice Ages," Canadian zoologist A. W. F. Banfield called it, and it was indeed during the Ice Ages that the caribou proved to be the savior of the human race.

In the colder part of the last glaciation, which ended in some areas no longer ago than 10,000 years, but in most about 75,000, the caribou was the chief source of food for Stone Age men, and provided them also with hides for clothing, excrement for fuel, sinews for thread, and bones for tools. There are paintings of caribou on the cave walls of France's Dordogne and Spain's Altamira. At the height of the glaciation, caribou, moving along the edge of the advancing ice, reached southern China, Turkey, southern France, Spain and Central America. When the ice receded, many of the hunters, who had become accustomed to depending on the caribou for their livelihood, followed it back into the north.

The caribou was able to cope with the Ice Ages because of its remarkable adaptation to freezing climates, including not only such obvious devices as the splayed hoofs which act like snowshoes and the cushion of hairs which protects a muzzle constantly thrusting into the snow to seek food under it, but one of the most ingenious systems of circulatory engineering in nature. This permits the animal to maintain two temperatures—one for the body, high enough to keep mammalian functions operating, and another, some 65 degrees lower, for the legs, which during most of the year are plunged into snow and need to hold to a temperature consistent with this circumstance.

Blood Heated, Chilled

This double standard of temperatures is achieved by an intricate meshing of the arteries carrying warm blood from the heart and the veins of the legs carrying chilled blood back, so that the arteries reheat the ascending blood to a reasonable temperature for the body while the veins chill the blood to the proper temperature for the feet.

Where the caribou originated is not certainly known, but it is believed to have been the mountainous regions of northwestern America or northeastern Asia—which may have constituted a single habitat if the caribou evolved during one of those periods when the Bering Strait did not separate the two continents. The most important species is the tundra caribou, *Rangifer tarandus arcticus*, identical in America and Asia, and so close to the domesticated reindeer (which the Lapps introduced into Europe) that some naturalists think the reindeer is nothing more than a tame caribou, slightly modified by 3,000 years of domestication; others prefer to describe the two as different subspecies of *Rangifer tarandus*. (Gourmets have less difficulty in distinguishing between them, since caribou is gamier than reindeer.)

The caribou is almost exclusively a North American mammal now, since in Asia the wild caribou has been almost completely crowded out by the domestic reindeer.

Indian Word

"Caribou" is an Algonquin Indian word meaning "shoveler," "pawer," or "scratcher," describing the characteristic movement of the caribou scraping away the snow with its hoofs to get at the food beneath—usually reindeer moss *(Cladonia rangiferina)*, a whitish-yellow many-branched lichen which covers the tundra to a depth of several inches as grass covers pastures in temperate regions. It is fitting that the animal's name should be of Indian origin, for it has been of great importance to American Indians, who have been progressively dependent upon it as they moved farther north, where other food animals become scarce or non-existent—and where the caribou persisted after it had virtually disappeared from the northern United States.

The taste of caribou meat is very much like that of venison, perhaps a trifle heavier and gamier; it is usually served with its naturally complementary accompaniment, a relish of some tart berry, like the lingonberry of the same habitat, which goes perfectly with it. Caribou provides tasty hams and can be made into first-rate sausage, in which case sharp spices are usually ground into the meat.

Accessible in recent years only to hunters resident in Alaska or Canada, caribou from Greenland is now appearing in limited quantities on urban markets.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

In Haifa, Israel:
PRODUCT MANAGERS
Nuclear Medicine
Nuclear Scientific Instruments
These responsible positions involve the worldwide marketing of a product-line profit-center including sales support, negotiation, new products. Substantial related experience is required.
In Wiesbaden, W. Germany
APPLICATION SPECIALISTS
Nuclear Medicine
Nuclear Scientific Instruments
To become *the* specialist in a particular line of Elscint's European Operations Center. Considerable travel. Requirements, multilingual plus related experience.
Elscint is a multi-national, rapidly-expanding manufacturer of state-of-the-art products in medicine, scientific instruments and data processing.
Reply in confidence with C.V. and recent photograph to: Director of Marketing.
elscint ltd.
P.O. Box 5038, Haifa (Israel).

UNE TACHE EXALTANTE AU SERVICE DE L'INDUSTRIE
vous attend au poste nouvellement créé de
SECRETAIRE GENERAL
INSTITUT TECHNIQUE EUROPEEN
patronné par un groupe industriel suisse de réputation mondiale.
Votre contribution à l'Europe de demain, vous l'apporterez en animant et coordonnant les diverses branches d'activités de l'Institut, qui se veut tout à la fois un centre de recherches, de formation et d'information à tous les niveaux.
Nous exigeons beaucoup de vous. Des études supérieures complétées de plusieurs années de pratique en milieu industriel, un esprit accessible à la technique et ouvert aux méthodes modernes de Management, un tempérament volontaire et le sens didactique sont les qualités essentielles pour la réussite de votre carrière. La maîtrise des langues française et anglaise est en outre indispensable.
Il s'agit d'une situation d'avenir qui permettra à une personnalité qualifiée d'accéder aux positions les plus importantes dans le Groupe. Votre rémunération sera élevée, les prestations sociales à l'avant-garde.
Si vous êtes donc un jeune cadre de 30 ans environ et certain de répondre au profil du poste, vous pouvez adresser votre offre de candidature sous chiffre PX 901,839 à Publicitas, CH-1002 Lausanne (Suisse).
Nous vous assurons de la plus entière discrétion.

CHANCE D'EPANOUISSEMENT
offerte à monsieur jeune ou d'âge moyen, si possible de formation universitaire, enthousiaste, énergique, ayant l'esprit d'initiative.
Nous lui offrons un poste de
SECRETAIRE GENERAL
DE DEUX FONDATIONS EXCEPTIONNELLES
Ayant de très grandes possibilités (l'une à vocation médicale et humanitaire l'autre à vocation philanthropique et consacrée aux beaux-arts), ces deux fondations ayant leur siège administratif dans les Bouches-du-Rhône.
Si vous êtes prêt à vous consacrer entièrement à ceux qui ont besoin des services de ces institutions, nous vous offrons une situation définitive et tout à fait captivante.
Nous demandons impérativement quelqu'un qui soit fasciné par une tâche à caractère humanitaire, spirituelle et intellectuelle, tâche qui lui apporte la satisfaction de se sentir utile. La connaissance de l'anglais et peut-être aussi de l'allemand serait souhaitée.
CONDITIONS INDISPENSABLES:
Vivacité poussée, goût d'une activité fort variée.
Adaptation aux directives données et surtout bonne volonté.
Salaire en rapport avec les responsabilités et l'importance de cette fonction.
Sens aigu des économies de frais généraux (par exemple: voyager en chemin de fer seconde classe).
Faire parvenir d'urgence concours détaillé, curriculum vitae manuscrit et photos récentes à :
M. Baermann, Postfach 3050, D-7 Stutigart 1, Deutschland.

...OYERS' APPOINTMENTS

ENGLISH LANGUAGE
Assistant Secretary
needed for European Regional Department American Insurance Company. Fluent English comprehension, shorthand and typing necessary.
Phone Personnel Section.
AMERICAN INTERNATIONAL UNDERWRITERS GMBH
6 Frankfurt/M., Mainzer Landstr. 2.
Tel.: 72 03 21.

INTERNATIONAL INVESTMENT ANALYST
Capital International S.A., jointly owned by The Capital Group, Inc. and the Chase Manhattan Bank, N.A., is adding to its international investment research team.
Applications are invited from experienced financial analysts capable of identifying and researching stockmarket investment opportunities on an international basis and of developing and maintaining high-level research contacts with the managements of companies located throughout Europe and the Far East.
This position requires initiative, maturity and an ability to communicate effectively. It involves heavy worldwide travel. Salary will depend on qualifications and experience and incentive compensation will be based on performance.
Qualified applicants who are Swiss nationals, or holders of Swiss work permits or equivalent, should write to:
Thierry Vanderveken, Director,
Capital International S.A.,
15 Rue du Cendrier, 1201 Geneva.

PROCESS PLANT SALES EXECUTIVE
Professional engineer of Director calibre with impressive process plant sales record in Eastern Europe or Middle East for London offices of major Chemical Engineering Contractor.
This opportunity can be explored, in confidence, by calling Peter Andrews at 01-730 3272 (London) on Thursday or Friday 31st May and 1st June from 11 am to 6 pm or by writing to the consulting firm:
the parallel planning corporation

Credit Restriction Tied to Inflation

In Stuttgart, in a speech to industrialists, Economics Minister Hans Friderichs said inflation has brought the country's economy into the "danger zone."

He urged investors, consumers, employers and workers to respect the rules set out in the government's anti-inflation program while reiterating government pledges not to introduce a freeze on wages and prices.

The program includes a 10 percent income tax increase for higher salary earners, an investment tax, curbs on public spending and on the building industry, higher oil and petrol taxes, and heavier company taxation.

Dollar Falls to Record Lows As Gold Price Hits New Peak

LONDON, May 30 (AP).—The dollar weakened in Europe today, dropping to record lows in Paris and Frankfurt, as the price of gold hit new highs.

Dealers said trading was slow in advance of the Ascension Day holiday tomorrow.

Some dealers blamed the dollar's new weakness on continued concern that the Watergate affair will weaken the Nixon administration's ability to solve U.S. economic problems.

But others suggested individual factors in European countries were running the dollar down on thin volume, perhaps only for the short term. In Frankfurt, for example, the dollar closed at a new low of 2.7160 deutsche marks, and bankers said the decision to raise lending rates there was the prime factor.

In Paris, the dollar sank to a new low of 4.3850 commercial francs and 4.37 financial francs. Dealers there, however, said uncertainty about tomorrow's meeting in Iceland between Presidents Nixon and Pompidou affected the market.

With the dollar under pressure against most other currencies, the price of gold hit new record highs in Europe's bullion markets. In London, the gold quote jumped $1.50 to $111.50 an ounce in the morning and climbed another $1.75 at the afternoon fixing to $113.25 an ounce. This was the highest fixing price ever reached; the previous high was $112.50 on May 21. In Zurich, gold closed up $3 an ounce at $113.25 an ounce.

Dealers suggested that outspoken remarks today in Rome by Guido Carli, governor of the Bank of Italy, may affect financial markets. He said that the official price of gold, now $42.22 an ounce, should be raised. In effect this would amount to another official devaluation of the dollar, since the U.S. currency is measured in terms of gold.

One Dollar...

Profit Soars 68% at Sony

TOKYO, May 30 (AP-DJ).—Sony Corp. reported today a 68 percent jump in net profits on a sales increase of 28.1 percent in the half year ended April 30.

The results, for the parent company only, showed profits of 10.25 billion yen ($33.8 million) compared with 6.1 billion yen in the same period a year earlier.

Sony said sales were 124.1 billion yen, up from 96.9 billion yen. The company announced an unchanged semi-annual dividend of 7.5 yen.

Sony attributed its gain in net profit to lower unit costs for items whose turnover increased sharply. The company also cited export depreciation reserve benefits totaling 354 million yen.

Sales of television receivers rose 21.5 percent from a year earlier, and turnover of tape recorders and radios rose 20.5 percent.

Sales of audio equipment and video tape recorders increased 62.3 percent while sales of other products rose 30 percent, Sony said.

Sony's consolidated results for both the second quarter of this year and the six months ended April 30 will be announced by the end of June, the company added.

Trading Margins Raised

U.S. Alarmed About Surge In Some Commodities Prices

By H. J. Maidenberg

NEW YORK, May 30 (NYT).—The U.S. government, which has promised an end to soaring food prices, has now become alarmed over the unabated surge in prices of soybeans, corn and wheat.

Prices of these key commodities have been setting highs day after day on the nation's exchanges despite the prospect for record harvests this year.

During the last four weeks, soybean prices have risen more than 45 percent, wheat 22 percent and corn about 30 percent.

The alarm in Washington is such that the Commodity Exchange Authority, a little-known regulatory arm of the Agriculture Department, has been holding unusual talks with leaders of the commodities industry to seek ways to "cool" the markets.

Alex C. Caldwell, the authority's administrator, said in Washington yesterday that his aides had spent the weekend conferring with officials of the Chicago Board of Trade, the nation's biggest market for grains and soybeans.

One result of the talks was that the Chicago Board of Trade's directorate met in emergency session before trading started yesterday and raised initial margins for futures trading, effective today.

The huge exchange has raised margins sharply several times in recent months and increased daily permissible price movements without any effect on either volume or prices.

The talks between the Commodity Exchange Authority and the Chicago Board of Trade over the weekend gave rise to rumors throughout the industry that the government was discussing a suspension of trading, but they were denied by Mr. Caldwell and officials of the Chicago Board of Trade.

Futures prices churned in an unusual range on the Chicago Board of Trade today. At the close, old crop soybeans were up 40 cents, while new crops dropped nearly 20 cents. Wheat fell 10 cents, maize 8 cents and oats 5 cents.

Analyst Hits Nixon's Policy

By H. Erich Heinemann

NEW YORK, May 30 (NYT).—One of Wall Street's leading economists launched a blistering attack yesterday on the Nixon administration's management of the national economy.

Speaking at the annual meeting of the New York Society of Securities Analysts, Henry Kaufman, partner and economist of Salomon Brothers—said that the economy was "veering out of control."

This was largely due, he asserted, to Washington's drive to stimulate business for "near-term social and political objectives," presumably including, although he did not say so, President Nixon's re-election.

The massive fiscal and monetary stimulation during the latest economic expansion, he said, "is without parallel in the post-World War II period."

Hits Phase 1

Phase 1, which "helped appreciably to strengthen business and consumer confidence, could have been best used as an appropriate period to slow fiscal and monetary stimulation," he said. But Mr. Kaufman said that "it was not." Instead, he charged, a confluence of "powerful stimulative forces" was allowed to develop that was "bound to trigger a massive economic lift."

Mr. Kaufman saved some of his sharpest barbs for the administration's Committee on Interest and Dividends (CID). "The sharp escalation in money rates to date without an accompanying rationing of credit," he said, "serves as a warning that a serious credit and economic confrontation is immediately ahead."

The CID's "dual prime rate" system, which seeks to keep interest rates charged to smaller borrowers steady while allowing rates on larger loans to rise, "may actually heighten the credit confrontation," he cautioned.

U.S. Firms Boost Outlay

NEW YORK, May 30 (IHT).—Capital appropriations by the nation's 1,000 largest manufacturers hit $9.51 billion in the first quarter, the Conference Board reported yesterday.

This amounted to a 15.5 percent increase from the upward-revised fourth quarter figure of $8.24 billion and a gain of 44.8 percent over the year-ago first quarter, said the board, a highly regarded private research group.

While 11 of the 17 industries surveyed increased their appropriations in the first quarter, the petroleum sector went the other way with a drop of 9 percent below last year's fourth quarter.

Also noted was an increase in manufacturers' backlogs in the first quarter, bringing the figure as of March 31 to $26.18 billion, up 12.3 percent from the fourth quarter and 33.2 percent from a year ago.

There are indications "from a subsample of respondents that increases in capital appropriations will be less pronounced in the second quarter of 1973," the board's report said.

But the trend to increase should carry into 1974 when the boom "may be expected to abate."

Selling Wave Batters Stock Prices

By Terry Robards

NEW YORK, May 30 (NYT).—A wave of selling tumbled into the stock market today and doused much of the remaining hope that had been kindled in last week's rally on the New York Stock Exchange.

The Dow Jones industrial average plunged 16.70 and closed at 908.87 in its third-largest decline of the year and the biggest since May 14, when it gave up 18.29. The pace of trading was light, totaling 11.73 million shares, up slightly from 11.3 million yesterday.

The renewed malaise in Wall Street may have been due to the sudden weakening of the dollar in European currency dealings and to the simultaneous increase in the price of London gold to a record level of $113.25 an ounce.

The pressure on the dollar apparently reflected doubts about the ability of the Nixon administration to carry out forceful economic policies as long as the Watergate scandal remains in the headlines.

Heavy trading in London gold reflected pessimism about other investment vehicles, along with speculation on the possibility of another world monetary crisis. Gold is traditionally regarded as a safe investment in times of uncertainty.

Soft Spots

Among the day's softest spots were Du Pont, down 3 1/2 to 174, Polaroid 3 1/2 to 133, Fairchild Camera 2 1/4 to 42 1/2, Monsanto 1 5/8 to 52 1/4, Exxon 3 1/8 to 94, and IBM 4 1/2 to 319.

Ponderosa Systems fell 4 1/8 to 50 1/8, although it reported first-quarter per-share earnings double that of a year ago.

Abbott Laboratories, which lost 2 1/4 yesterday, slid another 3 5/8 to 69 3/8. A federal grand jury yesterday charged Abbott with 60 violations of the federal Food, Drug and Cosmetics Act.

Fidelity Union Bank gave up 1 3/4 to 40 1/2. Fidelity and Colonial First National Bank said they have signed a letter of intent for Colonial to join Fidelity Union.

Also in retreat were Mgic Investment, down 3 to 64 3/4, Chrysler 1 to 27 3/4, Corning Glass 5 to 96 1/4, Dennison Manufacturing 1 1/2 to 23, Republic Steel 1 5/8 to 25 1/4, Trans-World Airlines 1 3/4 to 26 1/8, and Kaufman & Broad 1 3/8 to 20 1/2.

Meanwhile a quick sell out of Florida Power Co. first mortgage bonds helped pull corporate bond prices up 1/8 to 1/4 and a late rally helped government bonds cut early losses.

Gold mining issues climbed sharply as a result of stronger gold bullion prices in London. Dome Mines spurted 9 5/8 to 99 7/8, Homestake Mining 5 to 48 3/4, Campbell Red Lake 5 to 65, and ASA Ltd. 7 1/8 to 86 3/8.

Prices declined in light trading on the American Stock Exchange. The Amex index fell 0.13 to 22.65, while declines led advances 646 to 226. Turnover was 2.37 million shares, compared with 2.40 million a day earlier.

Sterndo Industries "A", the volume leader, fell 3/4 to 32 7/8. Shareholders of Sterndo and Hartz Mountain Pet Food agreed to a merger of the two companies. Hartz Mountain's stock dipped 5/8 to 27 5/8.

FINANCIAL NEWS AND NOTES

Shell Diversifies Energy Activities

Shell Oil Co. is forming a new group to move into coal, oil shale, tar sands and geothermal energy activities. The move is part of a general realignment designed to increase flexibility in Shell's exploration and production organization. It also reflects shifts in exploration activities domestically and intensified activity outside the United States, Shell says. Shell exploration and production units now centered in Denver, Colorado, Los Angeles and Midland, Texas, will move to Houston, Texas.

Ford of U.K. Has Record Year

Ford Motor Co.'s British subsidiary reported a post-tax profit of £27.7 million for 1972, compared with a loss of £17 million the previous year. It is the largest profit for calendar or fiscal 1972 reported by any major automaker in Britain. British Leyland Motor Corp. reported a net profit of £23.5 million for its fiscal 1972. For its British operations, Ford said 1972 was " a record year for production, sales, exports and profits, and every vehicle line in the company's car and commercial range became the best seller in its class."

Conoco Strikes Oil in Malaysia

Continental Oil Co. says an offshore Malaysia well has tested at a daily rate of approximately 6,000 barrels of low-sulphur crude oil and about 11 million cubic feet of gas. The company says at least one additional zone will be tested and delineation drilling and possible additional seismic surveys will be needed to determine commercial significance of this discovery.

Du Pont Expects Growth in Europe

E.I. Du Pont de Nemours says that sales and earnings growth achieved in Europe over the past few years is expected to extend into and beyond 1973. Last year, Du Pont's European business rose 17 percent to $556 million from $476 million in 1971 with investment in Europe growing by $100 million to $770 million. The company says that it is "actively evaluating opportunities" to build facilities in countries where it has no manufacturing investment to date.

Will Consider Distribution to Investors

Regulators to Meet on Frozen IOS Cash

...EMBOURG, May 30 (AP-... Representatives of the ...egulatory agencies inves...g the collapse of the In... Overseas Services (IOS) ...al empire have agreed to ...n June to seek accord on ...hey should do with the ...ssets of the IOS mutual ...they have frozen, Albert ...inger, chairman of the ...bourg Banking Commis...aid in an interview today.

...Dondelinger said that if, as ...es, a quick agreement can ...ched among the agencies, ...would immediately follow ...ith ICS officials and fund ...olders so that an initial ...nt from the about $145 ... that has been frozen can ...ade to holders of fund ... by late summer.

...said he has invited to ...bourg the heads of the ... Securities and Exchange ...ssion (SEC) and of the ... and Quebec Securities ...ssions of Canada.

...Dondelinger, who saw of... of the three other agen...uring a trip to North ...a last week, said the ...s have successfully frozen ...145 million of IOS cash. ..., $107 million was in Can...31 million in Luxembourg ...7 million in the United ... he said.

...noted that the SEC has ...ted the total cash assets ... IOS funds at $224 million.

He said the unfrozen cash appeared to be in Costa Rica ($60 million) and the Bahamas ($19 million).

About 80 percent of the total assets of the Luxembourg-based IOS fund, International Investment Trust (IIT), have been located, he said. This is the fund for which Luxembourg has direct supervisory responsibility.

Mr. Dondelinger said the four agencies had agreed to form a common front because it became apparent that acting separately they could be led into cross purposes by individual fund shareholders. He said it had not been decided among the four whether the funds should be revived or liquidated, though he favored the latter solution.

Lloyds Plans to Obtain 100% Of Lloyds & Bolsa Intl. Bank

LONDON, May 30 (AP-DJ).—Lloyds Bank today announced plans to acquire 100 percent of Lloyds & Bolsa International Ltd. in an effort to expand in the United States and further streamline its foreign operations.

The large London clearing bank said it is acquiring 5,025,000 shares of Lloyds & Bolsa from Mellon Bank of Pittsburgh, at 425 pence a share.

The cash transaction will increase Lloyds Bank's ownership of Lloyds & Bolsa by 12.6 percent to about 63 percent.

Mellon Bank will receive a gross payment equivalent to more than $54.6 million, of which about $18.8 million will represent an extraordinary net profit.

Lloyds Bank said it will offer its convertible bonds (unsecured loan stock) for the remaining 12,709,000 shares, or about 32 percent of Lloyds & Bolsa outstanding. However, the exact terms of the offer will not be announced until mid-July.

Free to Expand

Sources close to the transaction explained that U.S. Edge Act banking regulations had limited Lloyds & Bolsa's expansion in the United States to so-called foreign operations as long as Mellon Bank held a substantial minority interest.

Mellon Bank's withdrawal will permit Lloyds & Bolsa to expand, particularly by bidding for domestic deposits, one source said.

Lloyds Bank also intends to bring other of its foreign-oriented operations into the Lloyds & Bolsa group, sources said. But Lloyds chairman E.O. Faulkner has publicly stated that such consolidation will not include National & Grindlays Bank in which Lloyds Bank indirectly holds a 60 percent interest and First National City Bank of New York a 40 percent interest.

At the end of its financial year on Sept. 30, Lloyds & Bolsa had assets of £1.5 billion compared with assets of £5.7 billion for Lloyds Bank on Dec. 31.

France Increases Wages

PARIS, May 30 (AP-DJ).—The French government has decided to grant a 6 percent overall wage increase for 1973 to civil servants and military personnel, government spokesman Joseph Comiti said today. The four-step increase will affect about two million people.

Energy Demands Seen Expanding By 5.6% a Year

PARIS, May 30 (Reuters).—World demand for energy will expand by an annual average of 5.6 percent in the current decade compared with 4.9 percent a year in the 1960s, the Organization for Economic Cooperation and Development (OECD) predicted here today.

In a report on the present situation and future prospects for oil, the OECD, grouping 24 of the richest non-Communist nations, said demand in its member countries is expected to increase to 2.788 billion tons in 1980 from 1.573 billion tons in 1970.

This could be up to 70 percent of total world demand, expected to reach 4 billion tons—the equivalent of 80 million barrels a day—in 1980, it said.

Turning to North America, the OECD said that by 1980 the area may have to look abroad for nearly 35 percent of the supplies to cover demand.

Markets Shut

Banks, offices and stock exchanges are closed today in most of Continental Europe for the Ascension Day holiday.

SYNOMA TRADING COMPANY S.A.,
Case Postale Cornavin,
35 Rue des Paquis,
1211 Geneva 2, Switzerland.

I'm Karen. Fly my daily 747s from London to the Sunshine States of America.

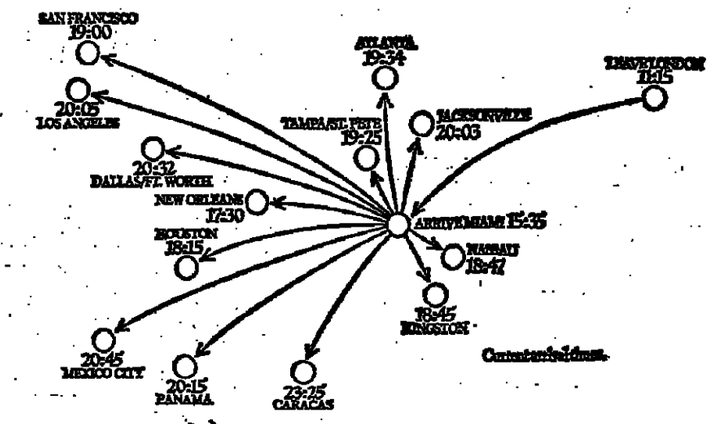

When do you want to fly to Miami? Pick a day, any day, and I have a 747 going there nonstop from London.

And if you want to branch out from Miami, I have great connections to all of Florida, New Orleans, Houston, California, the Caribbean...and that's just for starters.

My 747s are the most luxurious planes, with more cabin room than any other airliner, first-run movies*, multi-channelled audio entertainment and delicious international cuisine...as wel as my kind of personal service that leaves you relaxed and smiling at trip's end.

Telephone National Airlines direct or ring up your travel agent. And fly me.

Fly Karen. Fly National Airlines.

National Airlines, 81 Piccadilly, London W.1. (Reservations: 01-629 8272); 102 Champs Elysées, 75-Paris 8 (225 6475/256 2577); Wiesenhüttenstrasse 26, 6 Frankfurt/Main (232 101); Via Bissolati 54, Rome 00187, (06-478-030)

*Movies and stereo by In-Flight Motion Pictures, Inc. Available at nominal charge.
National honours American Express, Barclaycard, Carte Blanche, Diners Club, UATP, and cash.

RIP KIRBY

BLONDIE

BRIDGE

By Alan Truscott

Sam Kehela of Toronto, one of the top experts in North America, has no superiors and few equals in the art of playing a difficult dummy. Many opponents who have doubled him in haste have repented at leisure, as West did on the diagramed deal from the Vanderbilt Knockout team championship.

Three no-trump would have been an easy contract for North-South, but it was not easy to reach after East opened with a weak two-bid in diamonds. When this was passed around to Kehela's partner, Eric Murray, sitting North, he made a take-out double. Kehela, in difficulty, tried two hearts and North bid game, thus provoking West to make a slightly greedy double based on his trump length and strength, combined with a misfit in his partner's diamond suit.

The opening diamond lead was won with the ace, and the heart seven was led. Guided by the double, South was ready to take a deep finesse. But having betrayed his strong trumps West instead put up the ten.

The king won in dummy, and the declarer took the club ace and led the ten to his jack. He finessed the spade queen successfully, and after cashing one more club winner reached this position:

NORTH
♠ A4
♡ A93
◇ 8
♣ Q

WEST
♠ K106
♡ QJ52
◇ —
♣ —

EAST
♠ J9
♡ —
◇ KQJ43
♣ —

SOUTH
♠ 87
♡ 84
◇ 965
♣ —

The club queen was led and South discarded a spade. West ruffed and played the heart queen. The ace of hearts, the ace of spades and a spade ruff gave the declarer nine tricks, and the heart nine in dummy was a tenth. As Kehela admitted he would not have made the game but for the clue provided by West's double.

NORTH
♠ AQ4
♡ AK93
◇ 82
♣ AKQ10

WEST
♠ K1065
♡ QJ1052
◇ 7
♣ 762

EAST (D)
♠ J93
♡ 6
◇ KQJ1043
♣ 843

SOUTH
♠ 872
♡ 874
◇ A965
♣ J95

North and South were vulnerable. The bidding:

East	South	West	North
2◇	Pass	Pass	Dbl.
Pass	2♡	Pass	4♡
Pass	Pass	Dbl.	Pass
Pass	Pass		

West led the diamond seven.

BOOKS

THE PARIS COMMUNE

By Stewart Edwards. Quadrangle Books. 417 pp. Il. $12.50.

Reviewed by Hugh Brogan

A great historical tragedy, such as the story of the 1871 Commune, deserves a great historical treatment, so it is a pity that Stewart Edwards has merely provided a very good one. It can be confidently recommended to anyone interested in the subject, though beginners are likely to be put off by the inelegant, all-too-often ungrammatical academese in which it is written.

More knowledgeable readers will notice a string of obvious little errors (Place de Vosges, Palais Royale, la Guillatière, for example) and wonder uneasily how many less evident mistakes there are. All will agree that this is an exceedingly intelligent, lucid and erudite book from which all can learn. Alistair Horne's "The Fall of Paris" is written with much greater flair and human richness; otherwise Mr. Edwards's more detailed book is the best English-language work on the subject now available.

It ends with the statement that "the Commune was a revolution of more than just its own time." This remark is sure of widespread endorsement, but it is problematical nevertheless. To be sure, the Commune is one of the great socialist myths, its history having inspired much of the thought of Karl Marx and Lenin, and much of the continuing passion of the French labor movement. Yet this aspect of the matter has been written about rather too often. Everyone knows that Marx thought the Commune a proof that his theories were scientifically correct, and that Lenin inferred from its failure the lesson that revolutionaries, to succeed, must be relentlessly ruthless (as if one can imagine Lenin being anything else).

What has not been properly explored, at least for English-language readers, is the place of the Commune in the history of Paris herself. Thus Mr. Edwards gives a splendid account of the Commune's antecedents, but his epilogue on its consequences is thoroughly disappointing: it is too short and too much about Karl Marx. An opportunity has been missed: Mr. Edwards has allied himself with Marx and the rest in asserting that the Commune was a forward-looking affair, with an importance for posterity lacking in earlier revolutions (say, 1848). He has endorsed a very doubtful proposition.

In two senses the Commune, or rather its legend, did show itself "a revolution of more than just its own time." Marxists can plausibly present it as a forerunner of the Russian Revolution: Trotsky was struck by its likeness to the revolution of 1905. Secondly, the memory of the Commune and its dreadful repression (the army shot down from 20,000 to 25,000 Parisians of all ages and both sexes, among whom were an enormous number of innocents) has embittered French politics from that day to this. Still the bitterness of the French toward each other long predated 1871. And in all other respects the Comm surely an end, not a be

It was the last of t revolutions, dominated logues of a dying breed and federalists) and by ing class (the artisans soon to be overshadow industrial proletariat). I of the fall of Paris ancient position as cities, *la ville lumière* ment of French pow of civilization. Its failu ed the good-humored, self-confident tradition *sian revolutionism*, and way for the joyless di the modern Communis was a curtain falling of the Atlantic Revoluti which began in 1776. T have never repeated 1968.

And surely if the Com really the harbinger age, it must have been accidental? Yet, as M shows, it could easily avoided. Haussmann been more humane to t ed inhabitants of the extravagantly rebuilt. ond Empire could hav the Franco-Prussian might, if better prepa won it. The governm replaced Napoleon III shown itself a little mo a little less defeatist. of 1870-71 might not so cold. The National need not have trampl interests of Paris, a bleeding from the Prus as it did when it ordere of the moratorium on debts. Thiers need not to seize the guns from tre that, if he had Clemenceau, he might by negotiation. In sh was so little destined yet again, by revolution war that it took a long frightful chances to calamity inevitable.

To all this Mr. Edwa no doubt reply that it ment of the Commun that the people could and govern themselves, ed the way forward achievements. True, b revolution necessary to these points? Surely frightful slaughter and tion—more dead than Jacobin Terror, or the W ror of 1815, or the Fra sian War—would surely everyone that revolutio the best way to Utopia myth of the Commune so sedulously fostered.

Beautiful though it is the most blood-soaked world. St. Bartholom September Massacres, mune—these are merely conspicuous names in a To understand Paris it sary to understand its violent past. It is also to bury the belief that past we can derive tru of salvation.

Johncock Wins

s Killed, 1 Injured n Indy-500 Crash

NAPOLIS, May 30 (AP). n Johncock won an ab- 1. 56th annual Indiana- 0-mile auto race today teammate, Swede Savage, ically injured in a crash it mechanic was killed. pit crewman, Armando 2, of Santa Monica, Calif., ed by a fire truck, and also of Santa Monica, was ritically when his car hit at the head of the home- and exploded.

, flown to Methodist Hos- helicopter, suffered com- fractures of the right nd left tibia, and burns arms and the face. His was listed as critical le.

was thrown more than when he was hit by the k rushing to aid Savage. shortly after his arrival odist Hospital of a skull crushed chest, fractur- pelvis, arm and shoulder rnal injuries.

than half of the 32 cars made the halfway the event. Thousands ators shrieked in horror ccident. The car of Savage, an inside wall and ex- then ricocheted across the urse and broke apart at ide wall, spewing sheets s across the track.

race—already postponed s by rain and delayed five oday by damp pavement— pped immediately until the ould be cleared.

, who was with New Zea- Graham McRae's team, nning toward the wreck e was struck by a fire noving in the same direc- ith such force that the grill was deeply dented. her cars were involved in sh less than an hour after e began today. A number racers were sidelined by ical problems, however.

accident occurred after 58 required 200 laps around 1/2 mile (4 km) course. the track was cleared, the 21 cars remaining resumed the race in single file.

Savage was the second driver injured seriously in this year's competition here. David (Salt) Walther of Dayton, Ohio, still was in Methodist Hospital in serious condition with burns suffered when his car exploded and burst into flames in a 16-car accident at the foot of the homestretch Monday.

Only four drivers ever led the twice-postponed race. Bobby Unser was in front the first 39 laps, Johncock the next three, then Savage for 12 laps and Al Unser led until Johncock regained the lead after 74 laps.

The race was halted after 133 laps around the 2 1/2-mile track.

Winner Johncock, Savage and Teran all were members of the STP racing team.

The race, for the first time in history, was postponed by rain on two consecutive days.

The race was the shortest in the long history of the classic, begun in 1911, five laps less than Johnnie Parsons's 1950 victory.

Johncock covered 332 1/2 miles in 2 hours, 5 minutes, 26 seconds, an average speed of 159.014 mph. Johncock took his victory lap in the pace car, waving to virtually empty stands.

Boston's Cepeda Tops California With Homer

BOSTON, May 30 (NYT).—Orlando Cepeda, rescued from baseball's scrap heap by the designated-hitter rule in the American League, won another game for the Boston Red Sox last night.

Bothered by bad knees during most of his career, Cepeda hit a two-run homer off California's Nolan Ryan in the second inning that provided the Red Sox with a 2-1 victory.

Cepeda's homer, his seventh of the season, landed in the bull pen in right-centerfield and gave Boston the opener of the three-game series.

In the bottom of the second, Reggie Smith drew a walk from Ryan, then trotted home in front of the designated hitter. Cepeda's hit erased the 1-0 lead the Angels had taken in the first on hits by Sandy Alomar, Bobby Brooks and Bob Oliver.

The Angels threatened to score again off Bill Lee in the sixth, when Ken Berry singled and then moved to second on a bunt. Winston Lenas, pinch-hitting, also singled, but Smith fired a strike to the plate to cut down Berry, maintaining Boston's slim lead.

The Angels knocked out Lee in the eighth, when they loaded the bases, but Bob Bolin came out of the bull pen and got Tom McGraw to fly out, ending the inning.

Lee raised his record to five victories and one defeat. He was tagged for 11 hits, but the Angels stranded nine runners. Ryan (6-5) walked five but struck out 10, increasing his major league-leading total to 117.

Orioles 3, Royals 2

At Kansas City, Brooks Robinson singled home Paul Blair with one out in the eighth inning, and Jim Palmer pitched seven-hit ball as Baltimore beat the Royals, 3-2.

Blair had doubled, his third hit of the game, before Robinson broke up the 2-2 pitching duel between Palmer (5-3) and Paul Splittorff (7-3).

The Royals made a bid to tie the game again in their half of the inning, when Amos Otis tripled with one out. Otis attempted to score on a passed ball, but was thrown out at the plate, Andy Etchebarren to Palmer.

Twins 1, Brewers 0

At Milwaukee, Bobby Darwin hit a seventh-inning homer for the only run of the game and Bert Blyleven survived a ninth-inning threat to give Minnesota a 1-0 victory over the Brewers.

Blyleven, who evened his record at 6-6 with a six-hitter, surrendered singles to Ollie Brown and John Briggs to start the bottom of the ninth. Gorman Thomas, who ran for Brown, got to third base on Briggs's hit.

But Blyleven then nailed Don Money on a pop to short, and got pinch-hitter Ellie Rodriguez to bounce to shortstop Jerry Terrell, who took the ball just in front of second base and turned it into a double play.

Indians 9, Rangers 7

At Arlington, Texas, Cleveland welcomed the Rangers' new pitcher, Lloyd Allen, with seven runs in the first three innings and went on to score a 9-7 triumph.

Tom Hilgendorf (2-0) and Jerry Johnson combined to pitch 7 1/3 innings of strong relief of Dave Bosman, and George Hendrick drove in three runs with a single and a double.

Yankees 7, A's 2

At New York, in a display reminiscent of the days when such hitters as Ruth, Gehrig, Lazzeri and Dickey were making the Bronx Bombers a feared name, the Yankees clouted four home runs in defeating Oakland, 7-2.

Two of the circuit blows—both two-run drives—were contributed by Graig Nettles, who returned to action after being sidelined for two games because of a pulled thigh muscle. Bobby Murcer and Roy White produced the other two.

All four homers were hit in the second and third innings, during which New York scored all of its runs. The rally in the third, producing five runs, marked the 10th time this season that the Yankees registered five or more runs in an inning.

Lending an active hand in the home team's victory in its first meeting of the season with the world champion A's was Fritz Peterson. The southpaw yielded only five hits—two of the scratch variety—in pitching his first complete winning game of the season.

Pirates 6, Braves 1

In the National League, Luke Walker and Jim Rooker allowed a total of seven hits and Willie Stargell drove in two runs, one with his 13th homer, as Pittsburgh, playing at home, beat Atlanta, 6-1.

Walker gave up five hits and fanned seven in seven innings to pick up his second victory in four decisions, while Carl Morton took the defeat (4-4).

Rooker allowed two leadoff singles in the eighth, then retired the next three Braves and held Atlanta scoreless the rest of the way.

Cardinals 2, Reds 0

At St. Louis, the Cardinals gained their seventh consecutive victory, beating Cincinnati, 2-0, on an error by Joe Morgan and a run-scoring single by Ken Reitz.

Lou Brock scored the first run on Morgan's throw past first on Ted Sizemore's grounder in the third. Reitz's single scored Tim McCarver from second in the seventh.

Scipio Spinks, making his first start since May 1, pitched six strong innings before yielding to Diego Segui, who recorded his seventh save of the season.

Dodgers 9, Phils 3

At Los Angeles, Joe Ferguson hit a pair of two-run doubles to increase his league-leading total to 41 runs batted in as the Dodgers won their fifth straight, a 9-3 triumph over Philadelphia.

The Dodgers cracked 15 hits in winning their 10th game in the last 13.

Mets 5, Giants 2

At San Francisco, New York broke a four-game slide when they scored four runs in the ninth inning and defeated the Giants, 5-2.

Tom Seaver pitched a three-hitter for his fourth victory in a row, struck out 16 batters and even hit a home run. Yet, with all that, he was still trailing by 2-1 before the Mets roused themselves and sent 10 men to the plate in their last turn at bat.

The rally saved the Mets from falling into third place in the National League's East and lifted some of the gloom that had been spread earlier by the team's latest medical bulletin: Cleon Jones was sent back to New York for a new examination of his damaged right wrist.

Wednesday

Astros' Homers Defeat Cubs, 4-1

CHICAGO, May 30 (UPI).—Roger Metzger's first major league home run and John Edwards's fourth of the season carried the Houston Astros to a 4-1 victory over the Chicago Cubs yesterday.

Left-handed starter Ken Forsch gave up only three hits while completing his third game of the year and squaring his record at 5-5.

Metzger's and Edwards's homers both came with the bases empty and the Astros scored two additional runs in the sixth on consecutive singles by Bob Watson, Lee May and Doug Rader, along with Tommy Helms's sacrifice fly.

The Cubs' only run came in the first inning when Forsch issued a leadoff walk to Rick Monday, who moved to third when Glen Beckert doubled and scored on Billy Williams's infield grounder.

Ashe Advances To 4th Round in French Tennis

PARIS, May 30 (UPI).—Playing in a heavy drizzle, fourth-seed Arthur Ashe reached the last 16 in the men's singles of the 675,000-franc French Open Tennis championships today, defeating fellow American Harold Solomon, 7-6, 6-2, 6-7, 6-4.

The match was interrupted by rain last night with Ashe leading, 4-3, in what was to become the final set. When play resumed three hours late today the rain had eased from a steady downpour to a heavy drizzle.

Ashe finished the set in six minutes. Solomon was forced to serve for the match at 5-4 and Ashe proved the better wet-weather player. Officials then decided to postpone the remaining fourth-round matches until tomorrow.

The fourth-round men's pairings pitted top-seed Stan Smith of California against Holland's Tom Okker, second-seed Ilie Nastase of Romania against Frenchman François Jauffret, Ashe against Italy's Paolo Bertolucci, Floridian Frank Froehling against Nikki Pilic of Yugoslavia and Paul Gerken of East Norwalk, Conn., against Briton Roger Taylor.

Boycott Possible In Italian Race

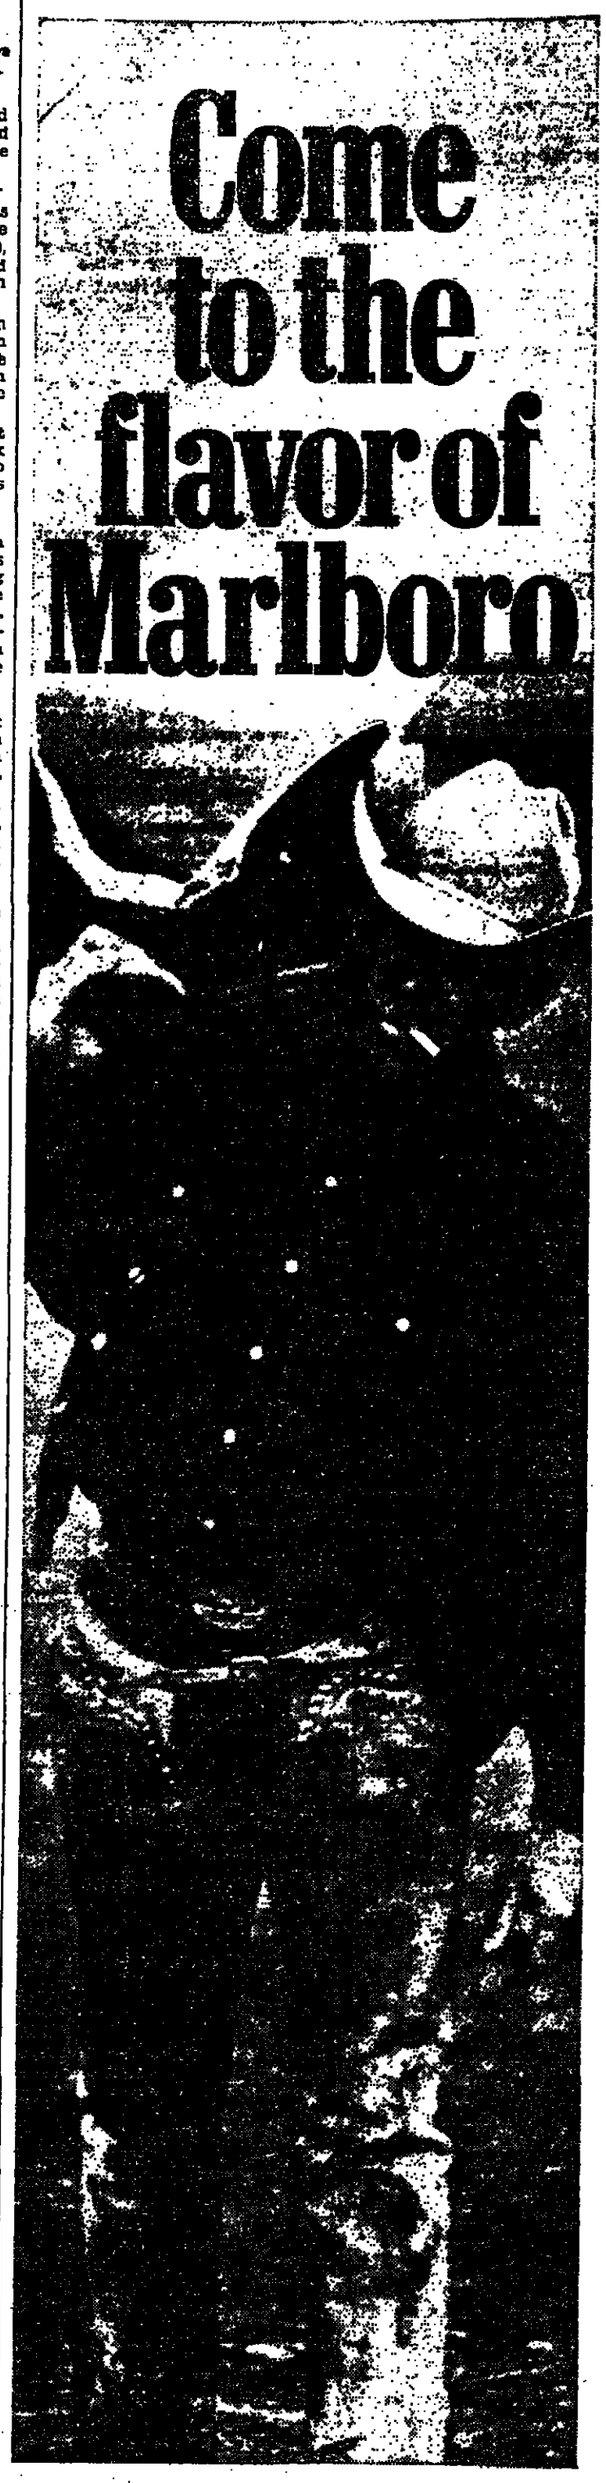

LONDON, May 30 (AP).—British motor racing chiefs have hinted at a boycott of the Italian Grand Prix unless manslaughter charges against Lotus boss Colin Chapman are dropped by police.

"If this charge sticks, no one will want to race in Italy," said BRM team manager Tim Parnell.

The charges stemmed from the death of Austrian Jochen Rindt at Monza in 1970.

"We thought this sad affair had all been forgotten," said Mike Doodson, a spokesman for Lotus. "It makes nonsense of motor racing if every time a car crashes the team manager could face criminal charges for negligence."

On the eve of last year's Italian Grand Prix which clinched the title for Lotus driver Emerson Fittipaldi, Chapman threatened to pull out if he did not have an assurance that he would not be arrested or have his cars seized.

Padres: Another Successful Failure

By Red Smith

NEW YORK, May 30 (NYT).—Five years to the day after C. Arnholt Smith and this daughter got up $10 million for a National League baseball franchise in San Diego, they sold the club to three guys in Washington, D.C., for $12 million.

Considering that the Padres laid an egg on the beach but still brought $2 million more than the Yankees cost six months earlier, this looks at first glance like another illustration of Soriano's law that in baseball nothing succeeds like failure. (In a single year, Dewey Soriano and his associates converted Seattle into a disaster area and then sold out to Milwaukee interests for $10.5 million.)

However, it is not necessarily so that C.A. Smith and Carol Smith Shannon are getting out on velvet. From an operating profit of something like $50,000, they had to pay $700,000 a year on the loan they swung to establish the Padres. And before the sale to Washington can become official, they must bail out of a stadium lease that has 15 years to run. The possibility that they might have to pay off the city of San Diego was, according to reports, one reason why the price went so high.

Latest word was that Smith was confident that all loose ends could be tied up soon and the league would approve the transfer, leaving only one important question unanswered: Who would throw out the first ball in Robert F. Kennedy Stadium next April? Who, that is, would still be out of jail?

To be sure, there are other, less significant questions. Like who are the men so pure of heart or weak of mind as to pay history's top dollar for the sorriest team in baseball and move it into a city abandoned by two other entrepreneurs in less than a dozen years?

Well, Joseph B. Danzansky is the 60-year-old son of a Washington undertaker who began life as a lawyer and now is head of a supermarket chain. The story is that when he became counsel for Giant Food, Inc., the two families who owned the chain 50-50, named Cohen and Lehrman, each signed over one-half of 1 percent of the stock. His 1 percent thus gave him a deciding voice in the business and ultimately he was elected president.

'...Who are the men so pure of heart or weak of mind as to pay history's top dollar for the sorriest team in baseball?'

In sports, Danzansky has been connected with harness racing as a member of the board of Roosevelt Raceway and is a director of the San Juan Racing Association operating the thoroughbred track, El Comandante, in Puerto Rico. He smokes cigars, likes neckties with regimental stripes.

Marvin Willig, also a director at El Comandante, is a pipe smoker. An attorney, investment specialist and real estate developer, he is known to friends as Bottom Tide Marv because of his sure instinct for hotting in on the final profit-and-loss statement in a balance sheet.

Dr. Robert Schattner completes the troika. A dentist with a flair for chemistry, he developed a mouthwash called Chloraseptic and sold it to the Pepto-Bismol people.

'In recent years, Washington has held an irresistible attraction for Californians. Some would stop at nothing to get there.'

Since Bob Short took the Senators to Arlington, Texas, after the 1971 season, the Armory Board which operates Kennedy Stadium has been stuck with a $24-million playground used by the football Redskins for three exhibitions and seven championship games and for two hospital benefit baseball games matching the Phillies and Pirates, Orioles and Red Sox. In the circumstances, Danzansky's group was able to get the park for a rental of 10 cents a head up to one million customers. Only once in 71 years did baseball draw a million in Washington. The club also gets all the baseball concessions' revenue and two-thirds of the football concessions.

This leaves San Diego with a stadium the city built for the football Chargers, with no assurance at the time that a baseball club would move in. The Chargers draw about 50,000 customers seven times a year. The Padres' average is slightly over 8,000 about 70 times a year.

Individuals close to the San Diego system cite two reasons why, as the Padres' president, Buzzie Bavasi, puts it, "We have never had a honeymoon year": (A) cramped between the desert and ocean, Mexico and the California Angels, the club could get only modest income from television and radio; (B) the climate encourages participation and San Diego, unlike the Los Angeles area, doesn't have millions to support spectator sports.

Nevertheless, with a one-year high of 644,272 customers, Bavasi's management produced a small operating profit. Smith and his daughter held 68 percent of the Padres' stock and assigned 32 percent to Bavasi, to be paid out of profits. Since he hasn't yet paid for his shares, Buzzie will make only a modest profit from the sale. He has not decided whether to accompany the team East, but the guess here is that he will. In recent years, Washington has held an irresistible attraction for Californians. Some would stop at nothing to get there.

Asked whether the team would be known by time-honored Washington names like Senators or Nationals, Danzansky called those designations "a little outmoded." He said that the owners probably would invite suggestions. Washington Spies would fit tidily in headlines.

2d Club to Win 3 Times

ax Beats Juventus, 1-0, in European Cup Final

RADE, May 30 (Reuters). of Amsterdam crowned g of European club soccer third successive season when beating Italy's Juof Turin, 1-0, to win the n Cup final.

jax, the first club to win hy three times in succesce Real Madrid's tremenn from 1956 to 1960, show- of its usual sparkle.

grabbed a fourth-minute red by 20-year-old Johnny Rep, and were content mainly to defend their lead during the rest of an often scrappy match.

The goal came when West German Horst Blankenburg overlapped down the left flank before sending over a diagonal cross, and Rep rose above the Juventus defenders to head home.

Cheered on by a capacity crowd of 100,000, the champions completely dominated the first half with their attacking football. Striker Johann Cruyff hit the near post and both Rep and fullback Wim Suurbier tested goalkeeper Dino Zoff with strong drives.

Juventus never really found their rhythm, although Roberto Bettega and striker Pietro Anastasi showed up in flashes.

More Determined

The Italians came out much more determined in the second half and the Ajax defense looked shaky under pressure. But Juventus could not snatch the equalizer, despite bringing on West German World Cup veteran Helmut Haller in the 63d minute.

Ajax now will meet the winner of the South American championship play-off between Colo Colo of Chile and Independiente of Argentina in defense of the World Club trophy.

Such was their strength that even fullback Suurbier was able to indulge in an overlap movement but his hard, low shot was well saved by goalkeeper Zoff.

All three Dutch forwards, Rep, Cruyff and Piet Keizer kept Zoff constantly in action while Juventus seemed reluctant to take on the Ajax defense.

When Juventus did break through in midfield, they relied mainly on Anastasi, but his long runs along the right were thwarted by the Ajax back line.

Cyclists Finish 11th Leg

BENEVENTO, Italy, May 30 (AP).—Belgium's Roger de Vlaeminck won the 11th leg of the cycling Giro of Italy today, coming in ahead of Italy's Felice Gimondi, countryman Eddy Merckx and Italy's Gianni Motta. But Merckx retained his overall lead.

The Watergate Saga

WASHINGTON.—It was May 1975 and the Watergate hearings were still being televised every day. It was the longest show in the history of television and, like "The Forsythe Saga," it was hard to keep all the characters straight.

The Bilkin family sat in front of their set, bleary-eyed, but determined to see it through.

On the stand was John Dean III who had been testifying every day for eight months.

Buchwald

Maude Bilkin said: "What a nice looking boy. Tricia made a smart choice marrying him."

"Tricia isn't married to John Dean," Alan Bilkin said, "she's married to Jeb Magruder."

The Bilkins' 16-year-old daughter Ellie spoke up. "I thought Julie was married to Jeb Magruder and Tricia was married to Sen. Sam Ervin."

"No," said Joel, the 18-year-old son. "Sam Ervin is married to Martha Mitchell. Their son is Henry Kissinger."

Maude replied: "I thought Henry Kissinger was the nephew of John Ehrlichman."

Alan Bilkin shook his head. "No, don't you remember last year it was revealed that Henry Kissinger was H. R. Haldeman's long lost son?"

"That's right," Joel said. "And Henry Kissinger and Martha Mitchell were in love but they broke up when G. Gordon Liddy tapped their telephone."

"Didn't Martha Mitchell marry Maurice Stans?" Ellie asked.

"No, she married Robert Vesco and moved to Costa Rica," Maude said.

"I don't remember that," Alan said.

"You were working that day," Maude explained.

"What happened to Dick Helms?" Alan asked.

"Dick Helms became the head of the Bureau of Indian Affairs and lost a finger at Wounded Knee," Joel said.

"I thought Bebe Rebozo was at Wounded Knee," Ellie said.

"No, Bebe Rebozo became the governor of Florida when Daniel Ellsberg was appointed the head of the CIA," Alan said.

"Wasn't Daniel Ellsberg Patrick Gray's lawyer?" Maude asked.

"No, Ron Ziegler was Patrick Gray's lawyer. But then he resigned to become the commandant of the U. S. Marine Corps," Joel said.

"I thought Richard Kleindienst was made the commandant," Ellie said.

"No, Kliendienst became the head of ITT after Dita Beard moved to Denver," Alan said.

"It does seem hard to follow," Maude said. "Let's listen."

Ellie said: "Dean seems to be talking about President Nixon."

"What happened to President Nixon?" Joel asked.

"He married Brezhnev's daughter," Alan said.

Maude replied: "It seems to me Spiro Agnew's son married Brezhnev's daughter. I think Nixon is still married to Pat."

"But if Nixon is still married to Pat, what happened to Donald Segretti?" Ellie asked.

"He was adopted by Senator and Mrs. Muskie and now lives in Maine with Jane Fonda," Alan said.

"I thought Jane Fonda had fallen in love with Daniel Ellsberg's psychiatrist," Joel said.

"I don't remember that," Maude said.

"You were shopping that day," Joel replied.

"Do you think John Dean will go to jail?" Ellie asked.

"I hope not," said Maude, "it would be awfully tough on Tricia".

Prize Is Richer For First Flight By Man Power

LONDON, May 30 (Reuters).—British industrialist Henry Kremer has added £10.000 to the prize he is offering for the first man-powered flight.

The Royal Aeronautical Society disclosed today that the Kremer prize now stands at £50,000 for the first person anywhere to perform a flight over a figure-eight course with the two turning points at least half a mile apart.

The chairman of the society's Man-Powered Aircraft Committee, Robert Graham, said he was confident the prize would eventually be won.

The best effort so far was by British Flight Lt. John Potter who pedaled a machine built by Royal Air Force apprentices for five-eighths of a mile in a straight line.

Teacher combines sound and movement to help deaf children to speak.

Speaking the Language of the Whole Body

By Elliot Carlson

ZAGREB, Yugoslavia (IHT).—Taking a sip of Turkish coffee, Petar Guberina eases out of his armchair and stands stiffly at attention. "Ta ta ta,' he booms out. Then he slouches a bit and lets his body go limp. "Buh buh buh," he intones mildly.

A graying, heavy-set man of 59, Mr. Guberina is demonstrating his theory that the entire body—not just the tongue or lips—is involved in producing sounds. He believes that body movements can actually influence the way people speak. It is simply a matter of connecting human sounds with their corresponding movements. According to Mr. Guberina, a sound like "t" is tense and can best be learned with the body taut. But "b" is softer and, so can best be learned with the body relaxed.

For Mr. Guberina, such gesticulations have a purpose. As director of the Center for Rehabilitation of Speech and Hearing here, he has been applying them to the problems of deaf youngsters. Using this approach, in which certain sounds are linked with jumping, running-in-place, slouching and dozens of other movements, deaf children supposedly can learn to speak more clearly than those relying on traditional methods.

In recent years, Mr. Guberina's approach, known as the verbotonal method, has spread to Canada, France, Brazil, the Netherlands and the United States, where some studies have borne out a number of Mr. Guberina's claims. The method resembles other oral ones for teaching the deaf to communicate in that it spurns sign language. But it is unique in its emphasis on body movements.

"The method works because it recognizes that language is based largely on rhythm and intonation," says Mr. Guberina, who is also director of the Institute of Phonetics at the University of Zagreb.

Primarily a linguist, Mr. Guberina arrived at his system rather unexpectedly. It grew out of a scheme devised by him and others in the early 1950s to teach foreign languages more effectively. That approach, known as the audiovisual and structural method, is now widely used in Western Europe and the United States.

Though consisting of many elements, it stresses rhythm, intonation and the contexts in which sounds appear. Among other things, students act out parts in simulations aimed at giving them a "feel" for how certain phrases or sentences are used in concrete situations. The emphasis is on accurately pronouncing and identifying specific sounds.

In one such session Mr. Guberina made a novel discovery: Students unable to grasp a foreign language often act like they are hard of hearing. Taking the observation a step further, he reasoned that language students and the deaf could be taught on the basis of similar principles.

How the system works becomes clearer after a visit to the center, a yellowing, three-story building in a quiet, residential neighborhood. Inside a small classroom, Vesna Pintar is going through a dizzying variety of motions. Harnessed in earphones to tap residual hearing, the children copy her motions and try to repeat the sounds she speaks into a mike.

More or less in unison, they move from the lotus position for soft sounds to running-in-place for tense ones. Then Miss Pintar demonstrates how different gestures can be combined to form words. Moving her arms like a Thai dancer and then stretching one arm skyward, she repeats "mama" over and over.

She also shows how such movements can be made into a complete sentence. Beginning from a crouch, she straightens, brings her arms up gracefully and leaps. "That means 'the bear is walking,'" says the attractive, dark-haired teacher, who, like all those at the center, has been specially trained in the dance.

Nor is this all. In little offices filled with electronic gadgets, youngsters daily get several hours of individual attention—and exposure to other innovations of the verbotonal method. For starters, they are strapped into earphones, placed on electrically charged platforms and given electronic oscillators that can be held in the hand.

Speaking into a mike hooked to these devices, the teacher tells stories aimed at helping the child discriminate between various sounds. "Where is the bee?" asks blonde-haired Olga Flas. The machines give off painless vibrations that are passed along to the child's brain and interpreted as sound. "Here it is," says a 5-year-old, who has just felt the vibrations and, thus, "heard" the sound.

The child, too, speaks into the mike, which enables him simultaneously to feel and hear his own speech. "In the beginning," says Mr. Guberina, "we don't care whether the youngster speaks words correctly. At this point we just want him to talk spontaneously, and to get the accurate rhythm and intonation of each sound."

After doing so, children will eventually speak words intelligibly, claims the linguist.

PEOPLE: *What the Barber Sa[...] At the Inn on the [...]*

Alfonso America, a young barber, was summoned recently to the ninth floor of London's posh Inn on the Park, and there he cut the graying hair and short gray moustache of a tall, heavily built man in a maroon dressing gown and slippers. Asked if he wanted a shampoo he replied, in an American accent, "No, I'd rather wash my own hair." Reporting on this later, Alfonso indicated that he was agreeably surprised when his customer—after being told that the barbershop-fee was $5.25 but the charge for house calls was discretionary—gave him $50.

Alfonso's customer was, of course, none other than the last of the baggy-pants billionaires, **Howard Hughes**, and Alfonso is one of only two persons known to have seen and spoken to him in the five months he has spent in Britain, according to UPI's Robert Musel. The other is Gov. **Mike O'Callaghan** of Nevada, who visited the ninth-floor suite in March to discuss the seven casinos Hughes owns in Las Vegas and Reno. The governor said Hughes had hinted that he might return to Nevada—he left in 1970. And adding to the meager stock of information on the subject, the governor declared that Hughes has "a commanding personality." The American tycoon was given a three-month residential permit when he arrived in London last Dec. 27 from Nicaragua. A three-month extension expires at the end of June and as far as anyone knows, Hughes has not applied for a further extension.

* * *

At the University of Tennessee, in Knoxville, the Daily Beacon will henceforth use "genderless pronouns" to avoid giving offense. The student newspaper's editors said that instead of "he" or "she" the Beacon will use "tey," and instead of "him" and "her" it will use "tem." For the possessive it will use "ter." Hmm.

* * *

A British tour organizer had drawn blood from the London Tourist Board. A spokesman has branded as "rubbish" the charge of **Wilf Jones**, who runs a travel agency, that foreign visitors are treated badly and often cheated. Last year, according to Jones, many tourists "limped home angry and... fleeced... picked down to the white bones." He also had some harsh words for Britain's "many rundown, seedy resorts."

Replying, the Tourist Board said it was "nonsense to claim British resorts aren't attractive enough for foreigners," and continued: "Foreigners just do not come to this country for sun and sand. They stay inland and in London, in the very places evacuated during the summer by Britons." He added [...]don's prices compare[...] those of other Europe[...] and that package tour[...] available at bargain p[...] an example, he cited [...] round trip from New [...] $320, covering air fare, [...] and eight theater ticke[...]
